T H E
NEW BATH GUIDE;
 O R,
USEFUL POCKET COMPANION

For all Persons residing at or resorting to this Antient City.

GIVING AN ACCOUNT OF

The **FIRST DISCOVERY** of its **MEDICINAL WATERS**
 By King **BLADUD**;

Saron and Roman Antiquities,

Nature and Efficacy of the **WARM BATHS** and **SUDATORIES**.

With the Rules and Prices of Bathing and Pumping.

The Virtues of the Bath Waters used internally and externally.

LISTS OF THE

Body Corporate,	Lodging-Houses,	Chairmen's Fares,
Attornies,	Boarding ditto,	Waggons,
Medical Faculty,	Price of Lodgings,	Carriers and Post,
Artists,	Mail and other	Barges to and from
Inns and Taverns,	Coaches,	Bristol, &c.

Institution and present State of the General Hospital;

Description of the Assembly-Rooms, Publick Charities,
 Churches, Chapels, and other Edifices.

The Principal Roads to different Parts of the Kingdom; with a Description
 of the City of Bristol, and the Hotwells; Monuments of Antiquity,
 and Gentlemen's Seats, in the Environs of Bath.

DIRECTIONS for Passing the SEVERN into WALES;

And many other Particulars worthy Observation.

[Embellished with *six* Copper-Plate Engravings, viz. Portraits of both
 Masters of the Ceremonies, Plan of the City, Elevation of the Town-
 Hall, View of the Crescent, and Portrait of Richard Nash, Esq.]

To which is added,

The Life, Character, &c. of **RICHARD NASH**, esq; who presided
 over the Amusements of this City upwards of Fifty Years.

A NEW EDITION, improved and much enlarged.

BATH, printed by R. CRUTTWELL,

For **A. TAYLOR**, bookseller and stationer, No. 12, Argyle-buildings.

Sold also by all the Booksellers in Bath and Bristol; by **R. BALDWIN**,
 Pater-noster-Row, and **E. NEWBERRY**, Corner of St. Paul's
 Church-Yard, London.—Price ONE SHILLING.

1795.

THE
NEW BATH GUIDE.

*A CONCISE ACCOUNT of the CITY of BATH,
Ancient and Modern.*

THE City of BATH is situated in a fine fruitful valley, in the north-east part of the county of Somerset, distant 13 measured miles from Bristol, and 107 from London; environed by a number of fertile hills abounding with springs of excellent water, which is conveyed by leaden pipes to almost every house in the city. The river Avon, which passes through it, is navigable to and from Bristol.

It has ever been famous since its first discovery for its *Medicinal Waters*. The Britons called this place *Tr Ennaint Tawmin*, as Camden informs us; but he does not explain the meaning, which is, *The Warm or Hot Bath*; it was likewise called *Caer Badon*, which is the very name it now bears, that is, the City of Bath.

It is said to have been built by Blethin, or Bledin Cloyth; that is, as Bale interprets it, *Bladud Magus*, or *Bladud the Sage*. He is said to have studied at Athens, and to have bestowed perpetual heat upon these waters by art magick. This has been rejected as a fable too gross to be believed: and perhaps Leland might be in the right, who thought it meant no more than that he found out the use of these waters, and guessed at the causes of their warmth; at least, this may be presumed, from the fragment of an old chronicle preserved by the learned Selden.

William of Malmesbury is for attributing the discovery of these springs, and the building of the City, to the Romans; and that he might go as high as he could, gives the honour to Julius Cæsar; which notion of his, Leland treats with contempt. That they were known to the Romans, and improved by them, is true; but not surely so soon after their

coming, since Solinus is the first author that mentions them; and he tells us there were hot springs in Britain, surrounded with elegant buildings, and dedicated to Minerva. Hence Camden very ingeniously conjectures, that upon their being thus adorned and dedicated by the Romans, the Britons gave them the name of *Caer Palladur*, that is, the City of Pallas's waters.

Ptolemy calls them, with great propriety, *Thermæ Sudatæ*, *Aque Calidæ*, or the Warm Waters. In the Itinerary we find them stiled *Aque Solis*, or the waters of the Sun; and Stephanus calls the city *Badini*. Bale tells us that some attributed the heat and virtue of these springs to a miracle wrought by St. David.

It seems, the Romans had fortified Bath in such a manner, that the Britons were not easily dispossessed of it by the Saxons, who became masters of it in the year 509. They gave it the name of *Acemannus Cæster*, which Camden and Bishop Gibson both interpret, the City of Valetudinarians. They called it also *Barbancester*, *Hat Bathan*, and *Baddanbyng*, all referring to its salutary waters.

Beda makes mention of these warm springs flowing in his days so copiously, as to form a rivelet, which he considered one of the most noble prerogatives of this island. In so high credit they were with the Saxons, that in dating charters signed here, they notice its being the place so renowned for its waters.

It suffered severely from the fury of Swane, who at the head of his Danish army plundered and burned it. After the Norman conquest, the city met with some misfortunes in times of publick commotion; but as soon as these were over, the splendour of Bath again revived.

Chance being the common source of such discoveries as bring Mineral Fountains, and their healing virtues, to the knowledge of mankind, we shall find it manifesting itself in a very singular manner at Bath; and in the most eminent case, leading an ingenious young Prince to one of the greatest secrets of nature, for the cure of a loathsome disease which he laboured under.

The story of the Prince having been solemnly handed down to the elders of the present age:—as they received it, we here repeat the substance of it:

“BLADUD, eldest son of LUD HUDIBRAS, (then King of Britain, and the eighth from Brute) having spent eleven years at Athens in the study of the liberal arts and sciences, (that city being in those days the chief academy, not only of Greece, but
of

of this part of the world also) came home a leper; whether from that hotter climate he had conversed in, or from ill diet, or infection, does not appear, those unlettered times giving down little or no account of things (though of greater moment) then transacted. But a leper he was, and for that reason shut up, that he might not infect others. Impatient of his confinement, he chose rather a mean liberty than a royal restraint, and contriving his escape in a disguise, went very remote from his father's court, into an untravelled part of the country, and offered his service in any common employment, probably thinking he was less likely to be discovered under such mean circumstances than greater: he therefore entered into service at Swainswick, (a small village three miles from this city) where his business (among other things) was to take care of pigs, which he was to drive from place to place, for their advantage in feeding upon beech-masts, acorns, haws, &c. the hills thereabout then abounding with such trees, though now few of the two former remain; yet there is a hill close upon the south part of this city, that still retains the name of Beechen-Cliff, though there is scarcely a beech-tree left upon it.

“Here the rising sun breaking through the clouds first saluted the Royal Herdsman with its comfortable beams; and while he was addressing himself to the glorious luminary, and praying that the wrath of heaven against him might be averted; part of the drove of pigs, as if seized with a frenzy, ran down the side of the hill into an alder moor, till they reached the spot of ground where the hot springs of Bath now boil up, and from thence returned covered with black mud. The Prince being of a thoughtful turn, and very solicitous to find out the reason why the pigs that wallowed in the mire in the summer to cool themselves, should do the same in winter, observed them further, and following them down, at length perceived a steam to arise from the place where the swine wallowed. Making his way to it, he found it to be warm; and this satisfied him, that for the benefit of this heat the pigs resorted thither, and after a while became whole and smooth from their foul scurfs and eruptions, by their often wallowing in this mud. Upon this he considers within himself why he should not receive the same benefit by the same means; he tries it, and succeeds; and when he found himself cured of his leprosy, declared who he was. His master was not apt to believe him at first, but at length did, and went with him to Court, where he was owned to be the King's son, and after his father's death succeeded him in the government, and made these Baths.

SAXON and ROMAN Antiquities lately discovered in digging foundations in different parts of the old City of Bath.

The ancient City of Bath is said to have been built by King Alfred about the year 900, and was surrounded by a strong fortified wall, a small part of which is still standing, and called the Borough-Wall. It appears to be of great antiquity, from the infinite number of ancient coins, statues, altars, inscriptions, and other monuments of Roman history, which have been, and are still daily discovered in and about it; and it is evident, that the city of Bath has been several times destroyed, either by civil commotions, or by fires; and that the old city was ten or twelve feet below the present one; for in digging some cellars in Stall-street, there was found (June 29, 1753) a pedestal, of which the following is a just representation, with the inscription. It may now be seen in the grand stair-case of the Guildhall.

In English.—This religious place, insolently thrown down, *Caius Severius Emeritus* purified and restored to the name and virtue of Augustus, in testimony of his gratitude.

Under this stone were found several coins of the Emperor Carausius.

In the year 1755, the late Abbey-House or Priory was taken down, which stood where the Duke of Kingston's baths now are, and the walls of it extended to the Abbey-Green and the back of Church-street. In digging out the ancient foundation of the Priory, the workmen found, about eight feet below the surface of the earth, several rough-hewn stone coffins, with the seeming entire, but mouldering remains of human bodies of different ages and sexes, and several pieces of coin of the successive Saxon Kings; the number of pieces, and different reigns, possibly denote the age of the interred.

Three or four feet below the burying-place of the Saxons, were discovered some cavities which led to the remains of several very noble Roman baths and sudatories, constructed on their elegant plans, with floors suspended upon square brick pillars, and surrounded with tubulated bricks, for the equal conveyance of heat and vigour. Their dimensions were very large. One of these Saxon coffins lay level with the floors of the sudatories, and another lay upon the shafts or part of the upright of one of the pilastres of the great bath; so that it is to be presumed, the ruins of these baths were so far from being known when the foundation of the old Priory or Abbey-House was laid, that they then hardly knew of the ground having been consecrated to a Christian burial-place. Hence it appears, that the Roman soldiery, though in so remote a station, entertained higher ideas of the conveniency, elegance, and use of baths, than the settled inhabitants of Great-Britain.

The spring which supplied these baths being cleared from the rubbish, &c. and the several ancient sewers for carrying off the water from the baths repaired, his Grace the late Duke of

* *EMERITUS* may either be the surname of Caius Severius, or may signify that he was past the military age, and had been honourably discharged from the duties of war, for his past good services.

† The *C* inverted, in ancient inscriptions, sometimes stands for the initial letter of a woman's name, and may therefore signify, that his wife *Caia* joined with him in this pious office.

‡ *P E G* stands for *Posuit Ergo Gratitudeinis*, and is therefore rendered, in testimony of his gratitude.

Kingston built on the same spot several baths and sudatories, upon a new plan, approved by some of the most eminent physicians, as well for the elegance and neatness of the design, as the utility of the several apartments.

In digging the foundations for the new Hot Bath, private baths, and sudatories, (near the Cross Bath) and in removing the rubbish to get at the head of the spring of the *Hot Bath*, and to make a new reservoir, a great number of *Roman* copper and brass coins of the Emperors *Nero*, *Adrian*, *Trajan*, *Antonine*, &c. were found, many of them in fine preservation; also an antique pillar, similar to that given in page 6, with the following inscription on it, which may also be seen in the grand stair-case of the Guildhall:—

DEAE
SVLIM
N³RAE
SVLNVS
MATV
RIFIL
V.S.L.M.

The characters appear to have been filled up with a red material like ochre to render them more legible and distinct.

It seems probable that this was a votive altar to *Minerva*, who represented the Moon in some places of the Heathen mythology, and was one of the patrons of the springs; as *Apollo*, who represented the Sun, was the other. Perhaps this was erected for some cure by the waters.—The following conjectures are given towards explaining the inscription:—

DEAE SUBLIMI* MINERVÆ SULINUS MATVRI FILIUS VOTUM SOLVIT LIBENS MERITO. *Sulinus, son of Maturus, gladly pays his grateful vows to the high Goddess Minerva.*

DEAE SUSCEPTO VOTO LOCUM INSTITUERE MINERVÆ, SULINUS MATURI FILIUS VOTUM SOLVIT LIBENS MERITO. *Sulinus, son of Maturus, having made a vow to dedicate a place to Minerva, has willingly and gratefully ratified his vow.*

In digging the foundation for building a new Pump-Room, Sept. 10, 1790, various remains of Roman antiquities were discovered below the houses that were pulled down on the east-side of Stall-street, near the King's bath, consisting of a votive

* As *u* is often used for *o*, SVLI may perhaps stand for SOLI, or be an abbreviation of SUBLIMI.

altar, a considerable part of a magnificent fluted column, two feet eight inches in diameter, and a beautiful Corinthian capital belonging to the same: there are also several massy fragments adorned with sculpture, in basso-relievo; one of these, which particularly attracts notice, exhibits a portion or a large ellipsis formed by a broad wreath of oaken boughs richly wrought; within this, at some distance, appears part of a similar ellipsis, proportionably reduced in size. The figures or embellishments contained in the interior space are yet undiscovered.* These blocks are surprisingly solid, and, when entire, probably formed an ornamental compartment in some circular recess or wall.

The votive altar, and various remains of victims discovered, indicate the site of a temple in this spot; and it is highly probable that the column might have formed part of its stately portico.

There were also found two fragments of a frieze, with letters cut on them of curious import.

The inscription on the altar, though not completely deciphered, imports, that the votary, named Aufidius, dedicates

This Altar to the Goddess:::
for the safety and preservation of [a relative]
Mar. Aufidius in the sixth legion.

The Deity to whom this altar was dedicated, appears to have been a local one. Part of an inscription, in distinct Roman

* The day after this account was drawn up, the centre piece above mentioned was discovered.

characters, upon an architrave discovered at the same time, confirms the same. Yet the temple might have been dedicated to Minerva, to which opinion one would be induced from some emblematick references to that Deity on part of the sculpture, as well as from the head of a beautiful form, formerly discovered in this city. These remains were found twelve feet or more below the present surface; and about the same depth the workmen met with an ancient paved way, consisting of broad free-stones, with a channel at the extremity to carry off the water.

It appears evident that these remains are part of a magnificent and elegant structure. From what was discovered near the Hot and Cross Baths a few years since, there certainly was a temple dedicated to Minerva: the head and horns of young cattle were found, and it is well known that young heifers were the victims of sacrifice offered to that deity.

A copy of an inscription on another altar is here given. It is poorly cut, and the letters ill formed.

There were several human skulls found in digging, but these laid not more than seven or eight feet below the present surface. They are deposited amongst the Roman antiquities in a room near the Cross-Bath; but to guard people from being misled about them, it is to be observed, that they were dug up from the remains of an old church-yard near ten feet above the place of the Roman remains.

[There has lately been published, a learned account of these and other pieces of antiquity, with engravings illustrative of the same, written by Governor Pownall, F.A.S.; in quarto, price 2s. 6d. printed for Cruttwell, and to be had of the book-sellers in Bath, &c.]

In order to form some conclusion as to the æra when this temple was erected, it may be necessary to take a cursory view of the progress of the Romans in Britain, from whence it will clearly appear, that the nation was not subjected to the Imperial power till the time of Claudius, or near fifty years after our Saviour. We learn too, from Tacitus, that Agricola (towards the conclusion of the first century of the Christian æra, or rather in the year 84) employed some time after his second expedition, in polishing the manners of the natives, and in encouraging and instructing them to erect temples, porticos, and baths.

It is hardly to be imagined, that the Romans could have built any spacious edifices in a country, *before they had reduced it to subjection*; or that there should have existed any considerable specimens of Roman architecture in Britain before the time of Agricola: since Tacitus attributes those splendid innovations, as well as the first cultivation of the arts in this nation, to the humane exertions and enlightened disposition of that General. These rays of civilization were only transitory and local.

The period of time from the departure of Publius Agricola from Britain, to the commencement of Hadrian's reign, did not greatly exceed thirty years. This Emperor was eminently distinguished for visiting the remotest and most inhospitable countries that had submitted to the Roman arms; while the tranquil state of the Empire, and its subordinate provinces, enabled him to adorn the latter with lasting monuments of his magnificence. Britain in particular experienced his attention. The *sixth* legion, surnamed the *Victrix*, mentioned in the above inscription, and the *twentieth*, were in Britain during the reigns of Hadrian and his successor. Many votive altars, now extant in Scotland, as well as sundry inscriptions dedicated to Hadrian and Antonine, inform us with what amazing labour the legions accomplished those immense barriers which formed the northern boundaries, known by the name of Hadrian's Wall.*

In 1793 the workmen, in digging near Sidney-Place, Bathwick, about four feet under-ground, came to a large stone, which on clearing proved to be a sepulchral altar in almost perfect condition, with a Latin inscription to the memory of Caius

* Although the walls of Hadrian and of Severus were of much greater extent and importance, than the one erected by Antoninus; yet the inscriptions dedicated to the two former Emperors, collectively taken, in point of numbers fall short of those which have perpetuated the undertaking of the latter. The walls of Hadrian and Severus extended near eighty miles.

Calpurnus, supposed to have been an officer of rank in Britain, and of a noble family in Rome, who died at the age of 75.

This city being surrounded by an amphitheatrical circle of hills, and situated to the west, is a considerable addition to its delights: for Hippocrates was of opinion, that a city so advantageously placed, and so much sheltered from the north-easterly winds, must be the most healthy to live in.

Although its situation is low, the air is at all times salubrious, and the inhabitants in general remarkably healthy. The late Mrs. Chandler, in her poem entitled *A Description of Bath*, makes the following observation on the City and its waters:

- “ If but one leper cur’d make Jordan’s stream
 “ In sacred writ a venerable theme;
 “ What honour ’s to thy sovereign waters due,
 “ Where sick by thousands do their health renew.
 “ The min’ral steams, which from the baths arise,
 “ From noxious vapours clear the neighbouring skies:
 “ When fevers bore an epidemic sway,
 “ Unpeopled towns, swept villages away:
 “ While death abroad dealt terror and despair,
 “ The plague but gently touch’d within their sphere.
 “ Blest source of health! seated on rising ground,
 “ With friendly hills by nature guarded round;
 “ From eastern blasts, and sultry south secure,
 “ The air’s balsamic, and the soil is pure.”
-

An Account of the Bath Waters, the Cause of their Heat, their Virtues in many Disorders, taken inwardly or used externally, the best time of drinking them, the quantity generally taken, and the proper time of Bathing.

THE Bath Waters, it is conjectured, derive their heat from passing through mineral beds, or being impregnated with the vapours of pyrites; or perhaps they derive their heat from an intrinsic cause, or subterraneous fire in the bowels of the earth. Very probable arguments have been urged, and great authorities there are on both sides; but we pretend not to decide on which truth lies. It is sufficient for our purpose, that the fact is certain, and that we have indubitable proofs that our hot waters have retained their warmth and their virtues through a long course of ages, and that, whatever the cause may be, there

there are no just grounds to apprehend that their salubrious qualities will ever fail.

Other authors imagine, that their origin is owing to a mixture and fermentation of two different sources distilling from the tops of two mountains, (*Claverton* and *Lansdown*) meeting in the valley where the town stands; for all hills have a nest of metals and minerals, and their bowels are cavernous and hollow. It is not therefore improbable, but that on *Claverton-Dow*n there should lie the sulphureous matter, which must rise by impregnation from that excellent stone lying in several parts of the mountain, which hardens in the air, and grows cased with a nitrous coat by time and cold weather; for all the mineral waters owe their virtue to an impregnation of rain water generated from the clouds, which are impressed in their course by mountains or eminences, and fall on the respective included minerals. And it is very well known that a due mixture of sulphur* and filings of iron, moistened with water, will produce any degree of heat. This stone, therefore, must have a large quantity of sulphureous or bituminous matter in its composition, as will be evident to a natural philosopher, from these mentioned qualities; neither is it improbable, that the ferruginous or iron-tinctured water takes its rise from *Lansdown*; the stone of it being hard, and on the top flinty, black, and acrimonious, as iron ore is known to be. These two mountains, thus tinged by rain water falling from the proper heights, meeting in some caverns in the valley, and there fermenting, produce that hot, milky, soft liquid, called BATH WATER; far beyond any hot mineral water for its delicacy, and superior to any other hot water yet discovered for its comfortable heat, as it possesses that milkiness, detergency, and middling heat, so friendly to weakened constitutions, which all other hot waters want in the due degree, either being too hot or too cold to do any great good in cases where they are prescribed.

The Monks imputed the virtue of these waters to a miracle of St. David. Alex. Nickam, a poet of the 13th century, thus describes them: Virgil's

* Dr. CHARLTON, in his pamphlet, entitled "*A Chymical Analysis of the Bath Waters*," ascribes that great degree of heat which is found in the Bath Waters to elementary fire, as to it's most probable cause; *this*, if it exist in any bodies at all, does so most eminently in iron and brimstone. It should seem then that these waters, by washing off, separating, and taking up, in their passage through the earth, the particles of these minerals, set at liberty this imprisoned element, which thereupon communicates it's warmth and activity to the fluid.

Virgil's fam'd baths o'er our's no palm can claim;
 Here old age blooms, here nimbly walks the lame;
 Congenial heats the longest strength restore,
 And pain afflicts the morbid frame no more.

These waters are beneficial in almost all chronical distempers, and can hurt in none, except in hæmorrhages, inflammations, or bad lungs, unless they be overdosed in quantity, or too high or too hot a regimen be joined with them; for they are very grateful to the stomach, have a fine sulphureous steely taste, like that of the German Spa, or Pyrmont; and procure a great appetite, and good spirits, if cautiously managed; but if high meats and strong liquors be indulged, they create inflammatory disorders. They are of a strengthening, cleansing, attenuating, opening nature. They comfort the nerves, warm the body, and are good in all constitutions: and among the many complaints for the cure of which the Bath Waters are remarkable, the *Gout* perhaps bears the first place; in bringing the paroxysms of this disorder to a happy crisis, by fixing them in their proper situation—the extremities; and thus relieving the head, stomach, and vital parts; in promoting the exit of the gouty matter by an easy and gentle perspiratory discharge, and thus, in a manner most agreeable to nature, giving a full and complete termination to the paroxysm, and by that means rendering the intervals more complete, and the limbs less likely to become rigid. In this disorder, the Bath Waters inwardly taken are unparalleled; nor are they less efficacious in certain stages of it, when externally applied. Bathing, in a decline of a fit of the *Gout*, either universal, or pumping on the part, has been found highly efficacious in promoting the exit of the gouty matter; and thus, in all probability, preventing the generation of those chalky concretions, which are so often the effects of a fit of the gout imperfectly terminated.

These waters are good in scorbutic rheumatism, and old wandering pains in any parts of the body, by bathing and drinking when the pains are not attended with any feverish heat. They are very beneficial in all disorders of the paralytick kind, in palsies,* convulsions, contractions, rheumatism, and lameness of all kinds; the bilious cholick in particular is singularly relieved by their use; as are obstructions of the liver and spleen, jaundice, scurvy, loss of appetite, and hysteric and hypochondriack

* A particular account of the efficacy of the Waters in paralytick and other cases, may be seen in Dr. CHARLTON's three Treatises on the Bath Waters.

driack disorders, when proceeding from weakness of the stomach. They likewise remove all sorts of cutaneous disorders, (particularly the leprosy) by washing off those malignant salts that occasion these maladies, when taken inwardly, and discharging them by perspiration in bathing: the sulphureous particles too in the water entering into the skin, and dissolving the salts which are lodged near the surface. And it is the given opinion, if any of the preceding disorders fail of relief by the Bath Water, it is because the patients will not allow time enough for their cure; or else are too loath to take pains, or cannot keep to such regular diet, as is absolutely necessary in stubborn cases.

It will be too tedious at present to enumerate all the diseases curable by Bath Water, internally taken or externally used.—As this water is so very proper a medicine in the principal disorders mentioned, where nature is very much oppressed; how rational is it to conceive, in cases where she is less grieved, that the water must succeed better!—Many people have come to Bath, tired with taking medicines (at home) to no manner of purpose; they have drunk the Bath Water with abundance of delight and pleasure, and by the help of a little physick have recovered to admiration.

The water should always be drunk hot from the pump, or else at your lodgings as warm as it can possibly be procured.—It is taken hot for the sake of the volatile spirit that circulates in it, which being of a like nature with the universal menstruum or alkali in our stomach, does wonderfully restore it, when lost or depraved. And it is somewhat strange to see its effects in the stomach, and decayed appetites, which are soon relieved by drinking the water hot from the pump. The water is generally drunk in the morning fasting, between the hours of six and ten, that it may have time to pass out of the stomach; though some drink a glass about noon: The quantity generally taken in a day is from one pint to three, though some drink two quarts; few constitutions require more.

OF BATHING.

Before the patient goes into either of the baths, a due preparation is necessary; the blood-vessels should not be too full, and the *primæ viæ* should be cleansed; without which cautions, Bathers are liable to head aches, fevers, &c. and not only lose the benefit they come for, but return to their homes much worse than they came.

The time for bathing is in the morning fasting at all times of the year; because, being refreshed by a night's sleep, we are
the

the better able to bear bathing ; and digestion being completed, we are not subject to disorders which arise from crudities, such as obstructions, head-achs, &c. and fasting too, because the natural heat being sent out towards the circumference, by bathing, digestion would be disturbed, were we to go in with a full stomach. You may drink a glass or two of the water while in the bath, it being very refreshing, and not only quenches thirst, but also promotes perspiration after. The time of staying in the bath must be regulated by the physician or apothecary, according to the patient's strength or disorder.

*An EASY CURE; or, a PRESCRIPTION for an INVALID
when at BATH.*

IF, brother Hyp, you want a cure
At BATH, a lodging warm secure ;
There drink the wholesome stream by rule,
When nature's stream runs low and cool.

Arise betime, to pump repair,
First take the water, then the air ;
Next strol to coffee-house, peruse
With air of negligence the news ;
Not caring whether party rules,
Provided no rebellious tools
Disturb the nation's public peace,
To interrupt your private ease.

Frequent your church in decent dress,
There offer up religious vows ;
Yourself to none but GOD address,
Avoiding foppish forms and bows.

When you've your due devotion paid,
Walk on the North or South-Parade ;
If weather's clear, in sun and air,
The best of whets—for food prepare.

Then sparing take of lightest kind,
To keep the vessels free from wind :
In wine and fauces don't exceed ;
Luxurious tastes distempers breed.

Nature refresh'd, let nature rest ;
With inward peace your mind digest ;
Digestion's work is easiest wrought
By cheerful chat and little thought.

Or,

Or, to disperse black fumes away,
 At Whist or Ombre cheerful play;
 Be unconcern'd at loss or gain, —
 A spirit ruffled raises pain.

The mind unbent, your thoughts prepare
 To bear a part in ev'ning prayer;
 That duty done, a draught repeat,
 Concoction help with liquid heat.

Then lounge at Coffee-house, in chat
 On various themes of God knows what,
 'Till two or more of friendly kind,
 Of nature good, of cheerful mind,
 In sense and mirth agree to pass
 The time 'till nine in circling glass:
 Then home to sleep; and rise next light,
 With spirits lively, gay, and bright.

Thus Invalids, from day to day,
 Must keep like clocks in constant way;
 Must moderate be in meat and drink,
 And rarely (very rarely) think;
 Must exercise, with gentle force,
 On foot, or coach, or pacing horse;
 Must rise and set at early hours,
 And ne'er exert beyond their pow'rs.

This course observ'd, will thousands save
 From pain, from anguish, and the grave.—
 Pills nature vex, and weaken too,
 These rules of health the man renew.

We shall now describe the several Baths, which are four in number, exclusive of those belonging to the late Duke of Kingston before-mentioned.

1. The *King's* Bath, which rises about 152 feet south-west of the Abbey-Church; the spring or main source of which is in the centre, and is covered over with a large leaden reservoir to restrain its rapid motion, and to disperse the water more equally to the different parts of the Bath, as well as to receive the pipes of the different pumps, which supply the water for drinking; by which means, as the water flows upwards in a strong, large, and uninterrupted stream, all communication between the water used for drinking, and the water in the bath, is prevented. Once in three or four years this reservoir is opened,

opened, in order to clear it of a sandy substance which the water brings up and deposits there, and which, if suffered to accumulate, choaks up the ends of the pipes which supply the different pumps. This sand is moderately fine, of a light grey colour, intermixed with a number of black particles, which, when examined through a microscope, appear not to be a crystalline substance like a great part of the remainder of the sand. It is not more ponderous than common sand of the same fineness.

[The *Hot* and *Cross* Baths have a reservoir of nearly the same construction, but we cannot find that it is ever necessary to open them on the same account, or that any substance of this kind was ever found in them.]

The springs were doubtless separated from the common springs by the Romans, and secured in with a strong durable wall. The dimensions of the *King's* bath are 65 feet ten inches by 40 feet ten inches, and it contains 346 tons 2 hogheads and 36 gallons of water, when filled to its usual height. In the center of this bath is erected an elegant building of freestone, with recesses and seats for the accommodation of Ladies and Gentlemen that bathe, and round it is built a covering supported by a handsome colonnade in the Doric order, that bathers may be sheltered from the inclemency of the weather.

Adjoining to this bath are two rooms, one for Ladies and the other for Gentlemen, in which are pumps for pouring the hot water on any part of the body affected, which have often proved more salutary than bathing the whole body in the common bath. In this bath there is a statue of King *Bladud*, which was erected in 1699; under which is the following inscription on copper:

BLADUD,
Son of LUD HUDIBRAS,
Eighth King of the Britons from BRUTE,
A great Philosopher and Mathematician,
Bred at Athens,
And recorded the first discoverer and founder of these Baths,
Eight Hundred and Sixty-three Years before CHRIST;
That is,
Two Thousand Five Hundred and Sixty-two Years
To the present Year,
One Thousand Six Hundred and Ninety-nine.

2. The *New Private Baths*, in Stall-street, adjoining the *King's-Bath*, erected under the direction of Mr. *Baldwin*, architect, with dry pump rooms, sudatories, &c. The first stone
of

of which was laid in 1788, by *Leonard Coward, esq*; Mayor, bearing a Latin inscription, signifying that these "Private Warm-Baths, devoted to Hygeia,* daughter of *Æsculapius*, "were provided at the public expence."

Against the wall of one of the Houses taken down for erecting these baths, a brass plate was affixed bearing the following Inscription:

"All poore persons not being conveniently able to mainteyne
 "them selves, & resorting to the Bath for cure of their
 "diseases or infirmities, may take notice, that there ought
 "to be a Physitian yearly nominated, & appointed by the
 "Maïor & Aldermen of Bath, who is to give his best
 "advice from time to time to the said poore persons, with-
 "out anyreward from them; there being a Salarie provi-
 "ded to that pvrpose by the charitable gvift of Dame
 "Elizabeth Vi-Coyntefs Scvdamore."

3. The *Cross*-Bath, which rises about 100 yards south-west of the *King's*, so called from a cross erected in the center of it by the Earl of Melfort, (Secretary of State to King James II.) as a memorial of the Queen's bathing in it in the year 1687.—This cross is now removed, the bath secured, the bathing rendered more convenient by slips for the bathers, and a small neat pump-room built, agreeable to the plans of Mr. BALDWIN.

4. The *Hot* Bath, about 120 feet south-west of the former, so called from its being deemed the hottest of all. Here is a neat Pump-Room for the company; and near thereto a commodious open bath, private baths, dry pump-rooms, and sudatories, (or vapour-baths) continually kept warm by the fires of the adjoining dressing-room, to which they communicate. Built under the direction of the late JOHN WOOD, esq; architect; to whose description, with the plans, elevation, and section, we refer the reader. The building is 56 feet square.

The heat of the several baths has been taken by Fahrenheit's mercurial thermometer, and is as follows:

The water of the *King's* Bath, in its warmest part, raises the mercury to 103 degrees, and sinks it in its coolest to 100.

The thermometer stands in the *Hot* Bath, at 100 or 101.

The degrees in the *Cross* Bath are 93 and 94.

* The Goddess of Health, among the ancients;—but the legitimacy of her *Æsculapian* production is somewhat suspected by the moderns, as there appears a wonderful *hiatus* in the family pedigree.

The water which is pumped up from the *cisterns* of the several baths for *drinking*, and which is conveyed through pipes immediately from its source, was found to be of various degrees of heat at different times of trial.

Thus the water which flows from the pump of the *Cross Bath* has descended from 110 degrees through all the intermediate ones to 105. That of the *Hot Bath** from 116 to 112: and the *King's Bath* pump from 116 to 114.

The following are the rules and orders (as established by the Corporation) for regulating bathing and pumping in the public and private Baths, and also the fees and conduct of the Serjeant, Bath-Guides, and Cloth-Women.

A Serjeant shall not demand more than three-pence for each time of bathing:—A Guide shall not demand more than one shilling for each time of bathing:—A Cloth-Woman shall not demand more than three-pence for each time of bathing.

Pumping in the *King's* and *Queen's Bath*, 2d. each hundred strokes; at the *Dry-Pump*, 4d. each hundred strokes.

The above fees are to be understood so as not to affect people in low circumstances, or servants, such being allowed to bathe for six-pence only to the Guide, for linen and attendance.

That no Serjeant, Bath-Guide, Cloth-Woman, or Chairman, shall demand any thing of a bather for his or their entrance on bathing or pumping, which has usually been demanded by the name of footing-money.

That sufficient fires (at the expence of the Chamber of the City) be made in the flues; to be lighted at six o'clock in the morning in the winter, and at five in the summer season, and to be continued the usual hours of bathing.

Bathing to be allowed on all holidays, except *Christmas-day* and *Good-Friday*.

And the following are the expences of bathing, &c. in the *New* private Baths, and *Hot Bath*:—

Each person bathing in the open bath, to pay 1s. 6d. for each time of bathing.—In the private bath, vapour bath, or sweating-room, 3s.—Bathing in the private bath, and afterwards using the sweating-room or vapour bath, 4s.—For the use of a bed, 2s. 6d.—Pumping in the bath, 3d. for one hundred strokes; and at the dry pump, 6d.

* Since the spring of the *Hot Bath* has been secured, the heat of the water is much increased.

The bath and pump to be paid for each time of using; and every person bespeaking a bath must pay for the same though not used, unless due notice be given that the bath may be let again.

Dresses, towels, &c. included in the terms.

N. B. Any gentleman or lady having cause of complaint against the attendants belonging to any of the baths, are desired to make such complaint known to the Magistrates at the *Town-Hall* any *Monday* morning at 12 o'clock.

The time people generally bathe in the King's Bath and Cross Bath is between the hours of six and nine in the morning, when there is a fresh supply of water; that which rises one day being discharged the next by drains into the river *Avon*; by which means the baths are always kept sweet and wholesome.

There are two sets of Assembly-Rooms in this city, viz. the Lower-Rooms, kept by Mr. *James Heaven*, on the Walks leading from the Grove to the Parades; and the New-Rooms, east of the Circus, kept by Mr. *Stroud*.

Mr. *Heaven's* Ball-room was built in the year 1750, is 90 feet in length, 36 in breadth, and 34 in height; with a very fine stucco ceiling. The view of the river, valley, and adjacent hills, makes it one of the pleasantest morning rooms in the kingdom. There is in it a portrait of the late *Richard Nash*, esq; and it is elegantly furnished with chandeliers, girandoles, &c.

The Card-Room is 60 feet long and 30 feet wide, with a coved ceiling, and has in it another portrait of Mr. *Nash*.—There are also two Tea-Rooms, 40 feet by 24 each.

The New Assembly-Rooms at the east end of the Circus are spacious and elegant. They were built under the direction of the late *John Wood*, esq; and furnished by a subscription of 70 persons, and cost upwards of 20,000*l*. The first stone was laid the 24th of May 1769, by the said Mr. *Wood*, architect, and they were opened for the reception of company in Oct. 1771.—The Ball-Room is 105 feet 8 inches long, 42 feet 8 inches wide, and 42 feet 6 inches high. The two Card-Rooms are, one an Octagon of 48 feet diameter, the other 70 feet long and 27 wide.—In the octagon Card-Room is a fine portrait of *Captain Wade*, late Master of the Ceremonies, painted by the late Mr. *Gainfborough*; and likewise a portrait of *Richard Tyson*, esq; the present Master of the Ceremonies, painted by Mr. *James*.

Every room is superbly furnished with elegant chandeliers, girandoles, &c. &c.

The amusements and terms of admission at each room, are as follow:—The subscription is 10s. each season to the gentlemen, and 5s. to the ladies; for which they are always open for the company to walk and play at cards, except Sundays, and then alternately, when cards are not allowed.

There are two Dress balls every week, viz. on Monday at the New Rooms, and on Friday at the Lower Rooms. The subscription one guinea to each room, for which each subscriber has two tickets, transferable to ladies only.

Subscribers of half-a-guinea receive one ticket, not transferable.

There are also two Fancy Balls every week, viz. at the Lower Rooms on Tuesday, and at the New Rooms on Thursday; subscription half-a guinea; ticket not transferable.

And Eight Concerts in the winter at the New Rooms, on Wednesday, under the direction of Mr. *Rauzzini*. Gentlemen's subscription one guinea and a half, and Ladies' one guinea; the tickets transferable.

Non-subscribers to the Fancy Balls and Concert pay 5s.

The following Rules and Regulations, published by each Master of the Ceremonies, are hung up in their respective rooms:

Lower Assembly-Rooms, Oct. 1st, 1787.

THE Master of the Ceremonies respectfully submits the following Regulations to the Company for their assent.

1st. That the seats at the upper end of the room be reserved for Peereffes, and Foreign Ladies of distinction.

2^{dly}. That Ladies who dance minuets be permitted to sit in the front of the side-rows, to avoid giving unnecessary trouble to those who do not dance.

3^{dly}. That Ladies who dance minuets be in full dress, with lap-pets: Gentlemen also in full drets: those of the army or navy are considered very properly dressed when in uniform, with their hair *en queue*.

4^{thly}. That after a Lady has called a dance, it being finished, her place in the next dance is at the bottom.

N. B. *It is deemed a point of good-breeding for Ladies that have gone down the dance, to continue in their places 'till the rest have done the same.*

5^{thly}. That those who stand up after the country dance is called, do take their place at the bottom, unless rank entitles them to precedence:

dence : And the Ladies are requested not to permit the intrusion of any couples above them, such compliance conferring a partial obligation, to the material inconvenience of those who stand below them.

6thly. That as the Subscription Balls end precisely at eleven, the Company do assemble as soon as possible after six o'clock.

7thly. That each Lady and Gentleman on publick nights pay sixpence on entering the room, which will entitle them to tea.

8thly. That Ladies may, if they please, wear hats in the publick rooms in the evening, except on Ball or Concert nights ;—Gentlemen are not to wear boots in the publick rooms of an evening, nor spurs in the Pump-Room of a morning.

9thly. That no hazard or unlawful games will be allowed in these rooms on any account whatever, nor cards on Sundays.

Lastly. That Ladies and Gentlemen coming to town, give orders that their names and places of abode be entered in any of the Pump-Room books; and the Master of the Ceremonies thus publickly requests the favour of such Ladies and Gentlemen, to whom he has not the honour of being personally known, to offer him some favourable occasion of being presented to them, that he may be enabled to shew that attention, which is not more his duty than his inclination to observe.

JAMES KING, M. C.

NEW ASSEMBLY-ROOMS.

The following are the Rules and Resolutions entered into by the Subscribers of the Dress Balls:

RESOLVED,

That the power of direction and controul relative to the publick amusements of these rooms, is in the subscribers to the Dress Balls, and them only.

That the weekly publick amusements in these rooms, during the season, be as follows:—

Monday Night	- - - -	Dress Ball,
Tuesday Night	- - - -	Card Assembly,
Wednesday Night	- - - -	Concert,
Thursday Night	- - - -	Fancy Ball.

N. B. *The rooms to be open every day, Sunday excepted, for Cards, and every other Sunday Evening for a Promenade.*

That a subscription of one guinea to the Dress Balls shall entitle such subscriber to admission every ball night, and also to two tickets, transferable to Ladies only.

That a subscription of half-a-guinea to the Dress Balls shall entitle such subscriber to one ticket every night, not transferable. Young ladies and gentlemen at their school-vacation will be admitted when introduced by a subscriber.

That a subscription of half-a guinea to the Fancy Ball shall entitle such subscriber to one ticket every ball night; this ticket *not transferable*.

That the Dress and Fancy Balls shall begin as soon as possible after seven o'clock, and conclude precisely at eleven, even in the middle of a dance.

That in future every person, on admission to these rooms on Dress and Fancy Ball nights, shall pay 6d. for tea.

That a reasonable time be allowed between the Minuets and Country-Dances, for Ladies of precedence to take their places; and that those who shall stand up after the dance is begun, must take their places for that dance at the bottom.

That no Lady do permit another to come in above her, after she has taken her place in the set.

That Ladies who intend dancing Minuets do wear Lappets; and it is requested that the rest of their dress be as conformable as possible to this distinction, regard being had to the prevailing fashion of the times. It is also hoped that Gentlemen will accommodate their dress to the Ladies.

That the three front seats, at the upper end of the room, be reserved for Ladies of precedence of the rank of Peeresses of Great-Britain or Ireland.

That Gentlemen's annual subscription for walking in these rooms be Half-a Guinea; and Ladies' subscription for the same, Five Shillings.

That no person be permitted to frequent the walking in these rooms who is not a subscriber.

That no Gentlemen in boots or half-boots be admitted into any of these rooms on ball nights, public card, or concert nights.

That no person be admitted into any of these rooms on Dress-Ball nights without a ticket; but that no ticket of admission to the card-room be required on Fancy-Ball nights from such persons as subscribe to the walking subscription.

That *non-subscribers* be admitted to the promenade on Sunday evening, Gentlemen paying one shilling, and Ladies six-pence, tea included.

That the renters of these rooms having agreed with the subscribers to furnish Twenty-six Dress Balls on the guinea subscription, and
Thirty

Thirty Fancy Balls on the half-guinea subscription, no annual account of expenditure be required of them.

That the musical band of these rooms do consist of twelve performers, including an harp, tabor and pipe; each performer to be allowed a sum not exceeding half-a-guinea on each ball night for his attendance, which money is to be taken from the subscription of the respective balls.

That five guineas per week be allowed from the Dress-Ball subscription to the payment of the accustomed band of ten performers in the Pump-room, provided the like sum of five guineas per week be appropriated from the subscription at the Lower Rooms for the same purpose.

That no persons be permitted to play with cards left by another party.

That no hazard, or unlawful game of any sort, be allowed in these rooms on any account whatever, nor any cards on Sundays.

That all future orders and regulations agreed to in general meetings be inserted in the subscribers' book, and signed by the chairman of the meeting for the time being; such orders and rules not to be altered by any authority whatever, but at a general meeting of the subscribers; and that the said book be deposited in trust with the renters of the rooms, to be produced at any time when a meeting of the subscribers to the dress balls shall be assembled, or when three or more subscribers shall desire to see the same.

That not less than nine of the subscribers to the dress balls be competent to call a general meeting upon any business relative to these rooms, the said nine to leave a summons signed with their names, upon the table for the space of one week previous to such meeting; which summons shall also express the particular purpose for which such meeting is called, and shall be published in the Bath papers.

That the Master of the Ceremonies, on receiving information of any person's acting in opposition to these resolutions, do signify to such person, that as Master of the Ceremonies, it is his duty to see the orders of the subscribers properly enforced.

As the late great extension of the city puts it out of the power of the Master of the Ceremonies to be regularly informed of the several persons who arrive here, he hopes they will be so indulgent to him, as not to charge him with want of attention, if he should happen to omit visiting them; and he thus publicly requests that they will, on their arrival, cause their names, with their places of abode, to be inserted in a book kept at the Pump-Room for that purpose, which will afford him such information as will enable him to comply with his own wishes, and the expectations of the public.

And

And as it is extremely desirable that all improper company may be kept from these rooms, he requests also, that all strangers, as well Ladies as Gentlemen, will give him an opportunity of being introduced to them, before they hold themselves entitled to that attention and respect, which he is ambitious, and ever will be studious to shew to every individual resorting to this place.

RICHARD TYSON, M. C.

No place in England, in a full season, affords so brilliant a circle of polite company as Bath. The young, the old, the grave, the gay, the infirm, and the healthy, all resort to this vortex of amusement. Ceremony beyond the essential rules of politeness is totally exploded; every one mixes in the Rooms upon an equality; and the entertainments are so wisely regulated, that although there is never a cessation of them, neither is there a lassitude from bad hours, or from an excess of dissipation. The constant rambling about of the younger part of the company, is very enlivening and cheerful. In the morning, the rendezvous is at the Pump-Room;—from that time 'till noon in walking on the Parades, or in the different quarters of the town;—thence to the Pump-Room again, and after a fresh stroll, to dinner; and from dinner to the Theatre (which is celebrated for an excellent company of comedians) or the Rooms, where dancing, or the card-table, concludes the evening.

THE GENERAL HOSPITAL (situated just within the old wall of the city, where the Theatre formerly stood) is an elegant pile of building, 100 feet in breadth, and 90 in depth. It is a foundation erected and established on the most generous principles, for the reception of the sick poor from all parts of the kingdom. The first stone of it was laid on the 8th of July 1738, at the north-east corner of the building, by the Right Hon. *William Pultney*, afterwards Earl of Bath, with the following inscription on it:

This stone is the first that was laid in the foundation of the GENERAL HOSPITAL;—GOD preserve the Undertaking!

The late *Ralph Allen*, esq; generously gave all the free-stone, (ready wrought) wall-stone, paving-stone, and lime-stone, used in the building of it.

This Hospital was opened for the reception of patients in the year 1742. It was instituted with a view to extend the benefits arising

RICHARD TYSON Esq.

Master of the Ceremonies, New Rooms.

Published as the Act directs, on March 1782.

24 DE 59

arising from the use of the Bath Waters to those whose narrow circumstances and situation in life might otherwise effectually bar them from all access to these salutary springs; and who might therefore with too much reason complain, "Though an angel hath troubled the waters, alas! Sirs, we have no friend to help us in!"—the expence of conveying a sick person from some of the distant counties to this place, and of supporting such a one during a course of the waters, being greater than many even in decent circumstances can afford, much less those whose daily bread is hardly earned by their daily labour, and whose only resource in time of sickness or distress is the parish pay.

Here, however, the liberal hand of charity hath erected an asylum, for those whose diseases are such as the Bath Waters bid fair to cure or relieve. Here all the sick poor of Great-Britain and Ireland, thus circumstanced, (*those of the city of Bath only excepted*) upon application according to the terms of admission, may, at the expence only of the journey hither and back again, receive every assistance the nature of their cases will admit, from the regular attendance of the Physicians and Surgeons belonging to the Hospital, and the use of the water, assisted by proper medicines, diet, and nursing.

The poor of this city are excepted, because it was supposed that they might enjoy all the benefits of the water at a very moderate expence, and be accommodated in their own houses.—And for this reason it was enacted, that no inhabitant of Bath should be admissible into, or receive any benefit from this establishment. As therefore this is not merely a local charity, confined to the poor of a particular district, but extends its arms to receive indiscriminately all those whom poverty and disease have rendered proper objects of its benevolence, it becomes in a peculiar manner entitled to the patronage and charitable assistance of all the strangers that resort to this place: And if, in such a work as this, we might presume to point out a mode of rendering this charity the most essential service, it should be by recommending, that the nobility and gentry would promote a permanent annual subscription from the respective parishes in which they have an influence, according to the plan of the late ingenious Dr. Oliver;—a plan which has been adopted by many parishes in this kingdom, who have felt and thus acknowledged the happy effects of this benevolent institution, in the restoration of many of their most useful inhabitants, from a state of the utmost misery and decrepitude, to perfect health and soundness. And here it must be observed, highly to the honour of the inhabitants of this city, that

that most of the principal citizens have been liberal benefactors, some by considerable donations, others by annual subscriptions, and very few, it is believed, (if any) omit to contribute in a smaller degree at the collection made every season for its support, at all the places of divine worship throughout the city: And the Governors, by the generous benefactions of the publick, have been for many years enabled to admit as many patients as the Hospital will hold, which amounts to 113.

The President, Treasurers, Physicians, and Surgeons, to the Hospital, as they stood May 1, 1794, are as follows:

Right Hon. Lord Viscount WEYMOUTH, President.

WILLIAM WATSON, Esq;

Mr. CHARLES PHILLOTT,

HENRY HARRINGTON, M. D.

DANIEL LYSONS, M. D.

WILLIAM FALCONER, M. D.

Mr. JOSEPH PHILLOTT,

Mr. HARRY ATWOOD,

} Treasurers.

} Physicians.

} Surgeons.

CONDITIONS of ADMISSION into the GENERAL HOSPITAL at BATH.

I. THE case of the patient must be described by some physician or person of skill in the neighbourhood of the place where the patient has resided for some time; and this description must be sent in a letter, franked or post-paid, directed to the Register of the General Hospital at Bath.

The age and name of the patient ought to be mentioned in the description of the case; and the persons who describe it are desired to be particular in the enumeration of the symptoms; so that neither improper cases may be admitted, nor proper ones rejected, by the Physicians and Surgeons, who always examine and sign the case as proper or improper, previous to their being laid before the weekly Committee.

If the Patient has any Fever upon him, as long as the Fever continues, he will be deemed improper. Patients with Coughs, attended with pain in the chest, or spitting of blood, are improper, as are also those with Abscesses or with any external Ulcers, until such Ulcers are healed.

From want of attention to the above particulars, and notwithstanding the cautions frequently given by printing the Conditions of Admission in the public papers, very imperfect descriptions of cases have been, and are still sent: And many Patients have been discharged as improper soon after their admission, to the disappointment of the patients thus sent.

II. After

II. After the patient's case has been thus described and sent, he must remain in his usual place of residence 'till he has notice of a vacancy, signified by a letter from the Register, accompanied with a blank certificate.

III. Upon the receipt of such a letter, the patient must set forward for Bath, bringing with him this letter, the parish certificate duly executed and attested before two justices for the county or city to which the patient belongs, and Three Pounds caution-money, if from any part of England or Wales; but if the patient come from Scotland or Ireland, then the caution-money to be deposited before admission is the sum of Five Pounds.

IV. Soldiers may, instead of parish certificates, bring a certificate from their commanding officers, signifying to what corps they belong, and that they shall be received into the same corps, when discharged from the Hospital, in whatever condition they are; and the same is expected from the Governors of Chelsea and Greenwich Hospitals respecting their pensioners. But it is necessary that their cases be described, and sent previously, and that they bring with them Three Pounds caution-money.

 *The intention of the caution-money is to defray the expences of returning the patients after they are discharged from the Hospital, or of their burial in case they die there. The remainder of the caution-money, after these expences are defrayed, will be returned to the person who deposited it.*

††† *All poor persons coming to Bath, under pretence of getting into the Hospital, without having their cases thus described, and sent previously, and leave given to come, will be treated as vagrants, as the act of parliament for the regulation of the Hospital requires.*

N. B. If any patient shall have the small-pox here, such person must be removed out of the house, and the caution-money defray the expences thereof. Likewise all persons who shall come into the Hospital, without decent and necessary apparel, must have such necessaries provided out of the said caution-money.

The Governors and Trustees of the Hospital have repeatedly by publick advertisements desired, that all Ministers and Overseers of the poor will be careful in their enquiries into the true circumstances of the person whose certificate of poverty they sign, and will take care that no person may be sent to the Hospital upon their authority, who has sufficient means to obtain the benefit of the Bath water without the assistance of that charity.

There is another Hospital in *Bell-Tree-Lane*, called *Bellor's Hospital*, a low building, founded by Thomas Bellor, esq; (one of the executors of Lord Cecil) in the reign of King James I. It is under the guardianship of the Corporation, and is appropriated

propriated to the use of poor men only, coming to this city for the benefit of the hot water. The number admitted seldom exceeds 18; they have the liberty of bathing gratis, a lodging, and an allowance of 1s. 10d. per week each person.

The charitable institution, called THE BATH CITY INFIRMARY AND DISPENSARY, on the Lower Borough-Walls, has now existed under different forms for near Fifty Years. Formerly it afforded only Advice and Medicines to the Sick Poor, who either applied for them at the Dispensary, or were occasionally visited at their own homes. But the increased extent and population of Bath rendering it impossible to visit the sick as often as their cases required, and an experience of the inefficacy of medical assistance to persons without proper accommodation, and other necessities, who laboured under acute and contagious diseases, suggested the change of the Institution.

This INFIRMARY was first opened in 1792 for the reception of the more dangerous and urgent Cases; while patients afflicted with maladies of a less pressing nature continue to receive the same benefits as Out-Patients as they enjoyed under the former establishment.

BARONESS of BATH, Patroness

Sir JOHN RIGGS MILLER, Bart. President

Rev. Mr. DOBSON, } Vice-Presidents
Major BROOKE, }

Mr. CHARLES PHILLOTT, Treasurer

JOHN EWART, M. D. } Physicians
J. MOODIE, M. D. }
ROBERT MASTER, M. B. }

Mr. NOOTH, Surgeon

Mr. WILLIAM WHITE, Apothecary.

The President, Vice-presidents, the three Physicians, and Surgeon, together with 16 or 18 Subscribers, are the Committee for conducting the business of the charity.

This Institution is the only resource which the Sick Poor of this city can flee to, under whatever description of disease they may labour; for *they*, without it's charitable aid, have not even the means afforded to *strangers* of employing the Waters, so bountifully bestowed by Providence on their native place.

The Physicians attend every day at one o'clock to give their advice; and the Surgeon whenever cases require his attendance. They have no pecuniary reward for their trouble.

Persons

Persons receiving parish pay are inadmissible, and no patient can be admitted without bringing a printed recommendatory ticket from a subscriber; each subscriber receiving, on payment of their subscription, six such printed tickets for each guinea.

The number of patients admitted during the last year was 887; of whom 111 were in-patients, 734 out-patients, 32 children of the Sunday schools, and 30 Subscribers' servants.

Subscriptions for the support of this charity are received by the Treasurer, Vice-Presidents, the Physicians, and at the Libraries.

CHURCHES, CHAPELS, &c. &c.

The Cathedral Church of *St. Peter and Paul*, commonly called the ABBEY, (supposed to be built on the spot where stood the Roman temple of Minerva, who was the tutelar deity of the hot springs) is a noble edifice, built in the shape of a cross, and founded in the year 676, by King OSRIC, together with the Abbey-House for Nuns; but in the year 775, King OFFA placed therein secular canons, who being expelled by King EDGAR, he instituted Benedictine Monks in their stead; and it was frequently repaired and augmented, 'till OLIVER KING began the present pile in 1495, which was occasioned by a vision or dream of his, as related by Sir John Harington. "The Bishop," says he, "having been at Bath, imagined, as he one night lay meditating in bed, that he saw the Holy Trinity, with angels ascending and descending by a ladder, near to which was a fair olive-tree supporting a crown." The impression was so strong, that the Bishop thought he heard a voice which said, "Let an Olive establish the Crown, and let a King restore the Church." This had such an effect upon the good Prelate, that he instantly formed a design to rebuild the Church of St. Peter and Paul; accordingly he set the work immediately in hand, and as Sir John concludes, caused this vision to be represented on the west front of it, under the title of *De sursum est*, "It is from on high."—The pious Bishop was prevented from completing this work by death; and upon the dissolution of the religious houses, this church coming into the King's hands, and the townsmen refusing to purchase it of the King's commissioners for 500 marks, it was entirely stripped of the lead, glass, iron, timber and other materials; in which condition, with only the bare walls standing, it remained upwards of 100 years, 'till 1606, when

when it was restored to its present state by the pious benefactions of Dr. James Montague, then Bishop of this diocese, and other generous benefactors, and made parochial.—The west front of this elegant structure is enriched with several statues, besides a representation of the vision of Oliver King, as above related. It contains many curious monuments; has a handsome altarpiece, representing the Wise Men's Offering, given in the year 1725 by General *Wade*, one of the representatives of this city; and an excellent organ, thought by very good judges to be one of the best in Europe. This church was formerly called the *Lantern of England*, on account of the number and size of its windows; but as it is now inclosed by houses to the north and south, the light is much intercepted; it is a stately and elegant structure, contains a vast number of neat and elegant monuments, and affords the curious stranger as much speculation as any parochial church of the same standing in England. The tower (which is 162 feet high) has an excellent peal of ten bells. The length from east to west is 210 feet, and from north to south 126; the breadth of the body and side aisles is 72 feet, and the windows are 52 in number. Here is divine service every day, at eleven in the forenoon, and at four in the afternoon, which was set on foot, and is supported by the voluntary subscriptions of the company resorting to Bath, it being thought necessary that prayers should be performed daily at one of the places of religious worship in this city. The company are therefore desired to leave their contributions at the Pump-Room, at Mr. Heaven's, or the Coffee-Houses, where books are opened for that purpose, as it is the only emolument that the Curate [the Rev. Mr. Maggs] receives for reading prayers every day throughout the year.

The several parishes in Bath are consolidated into one rectory, which is in the gift of the corporation, and has the vicarage of Lyncombe and Widcombe annexed to it. The Rev. Dr. Philott is the present incumbent.

The parish church of *St. James* was rebuilt (chiefly by voluntary subscription) in the year 1768 and 1769, under the direction and agreeable to the plan of Mr. Palmer, of this city, architect; and is a very neat freestone building with fronts in the Gothick taste. The ground plan is a parallelogram of 61 feet long by 58 feet wide within the walls; the roof is supported by four Ionick columns; the ceiling is divided into three parts; the middle is finished with an entablature and coving, and the two sides with an architrave only, of the Ionick order. The altar

altar forms a niche set round with columns and pilastres, with a Dorick entablature. The tower was rebuilt in 1726, and has a peal of eight musical bells. In 1782 a new and excellent organ was erected in this church, by Mr. Seed of Bristol. Here is divine service on Sundays, and prayers Wednesday and Friday mornings; and morning prayers on Saints-days. The Rev. Mr. Warner is the officiating minister.

The church dedicated to *St. Michael* was begun to be rebuilt about the year 1734, and finished in 1742, at the expence of the inhabitants, by a voluntary subscription in some, and by a rate upon the whole, except a handsome subscription of the late General Wade, and a few other private benefactions. It is finished in the Dorick order, with a fine dome; and is a very neat church in the inside, having a painting of our Saviour, and another of Moses over the altar; the former by Mr. Hoare of this city, the latter by Mr. Robinson of London. It has a musical peal of eight bells, and an organ. The Rev. Mr. Wake is the curate. Here is divine service as often as at St. James's.

The parish church of *Walcot* stands within the liberties of this city; it was rebuilt in the year 1780, and has been since very much enlarged on account of the great increase of the inhabitants; it is a neat church, and has a good organ. The income of this rectory is equal to that of the consolidated churches in Bath; the present incumbent is the Rev. Mr. Sibley; his curate the Rev. Mr. Dowson.

The Chapel near the south-west corner of Queen-square is dedicated to the *Blessed Virgin Mary*, and was built by the late Mr. Wood, by a subscription of several gentlemen, who are now proprietors of it. The inside is of the Ionick order, and is 57 feet long, 48 broad, and 36 high: The outside is of the Dorick order. It was opened Dec. 25th, 1735, for divine service; which is performed here twice every Sunday, at eleven and four; and every other day at eleven. The officiating clergyman is the Rev. Mr. Sibley.

The *Oblagan* Chapel in Milford-street, which was opened for divine service the 4th of October 1767, was built agreeable to the plan of Mr. Lightholder, architect, and is in great esteem for it's neatness and elegance. It has a fine altar-piece, representing the Pool of Bethesda, painted by Mr. Hoare, and an excellent organ. Divine service is performed here every Sunday at eleven and five, and prayers every Wednesday and Friday at eleven. This chapel was purchased from the executors of the late Mr. Street, by the Rev. Dr. Gabriel, and the Rev.

Mr.

Mr. Randolph, who are the sole proprietors and officiating ministers.

Margaret Chapel, situated in Margaret-buildings, Brock-street, is built in the Gothick order, with galleries; is 70 feet long, 60 wide, and 37 high, besides a large recess for the altar, over which is placed a capital picture of the Wise Men's Offering, painted by Mr. Williams, late of this city. The roof having no supporters, makes it very light, spacious, and elegant: it has an exceeding fine-toned organ, and two of Buzaglo's stoves. Divine service as at the Octagon. The Rev. Mr. Bowen is the officiating minister.

The Chapel dedicated to *St. Michael*, near the *Gross Bath*, is a very neat and light building, and was erected by Mr. *Killegrew* about the year 1728, in the place of the old one which was much dilapidated. It is annexed to a Hospital dedicated to *St. John the Baptist*, founded in the reign of Henry II. by *Reginald Fitz Jocelaine*, Bishop of this see, who endowed it with an estate called *St. John's Farm*, contiguous to the city, for the maintenance and support of six aged poor men, and as many poor women of this city, and a master, who must be a clergyman of the established church. The apartments of the old people were rebuilt in the year 1728, by the then *Duke of Chandos*, in consideration of some advantages he received in erecting Chandos-Court. The Hospital estate has been greatly improved by being let out on building leases; the fines paid for renewals, which are divided between the master and the co-brethren and sisters, render the situation of the latter very comfortable, and make the mastership of the hospital, which is in the gift of the corporation, no inconsiderable benefice. Divine service is performed twice every day in this chapel, which is very decently ornamented, and furnished with commodious pews, that are opened to christian worshippers of all ranks. The Rev. John Chapman, D. D. rector of Weston, and prebendary of Bristol, is the present master.

All-Saints Chapel, Lansdown Place, opened for divine service on Sunday the 26th of Oct. 1794, was built by a subscription of several Gentlemen, who are now proprietors of it.—It is in the Gothick stile, and is 64 feet long by 46 feet wide within the walls, exclusive of four recesses, with a fire-place in each. The gallery continues all round the chapel, the front of which forms an oval, and is supported by eight light Gothick pillars, which support also the roof. The middle part of the ceiling is also an oval, and rises 6 feet higher than the ceiling over the gallery; is enriched with stucco ornaments and cove ribs springing fan shape

shape from each column. There are 12 large windows above the gallery, in the tops of which are paintings on glass of the heads of the Twelve Apostles, set round with variegated glass; —the window of the altar has a transparent painting of the Lord's Supper. The paintings are by Mr. Barker. The building was executed after the plans and under the direction of Mr. Palmer, architect, of this city. The Rev. Mr. Charlton is the officiating minister.

Kensington Chapel, (adjoining the London road) in the parish of Walcot, was opened for divine service in January 1795.—It was built by subscription, and is a neat building in the modern stile, 62 feet long and 42 feet 6 inches wide within the walls, exclusive of a recess of 21 feet by 12 feet 6 inches. Has three fire-places in it, which make it very warm. It was built under the direction of Mr. Palmer, of this city. The Rev. Dr. Godfrey is the officiating minister.

The little Chapel dedicated to *St. Mary Magdalen*, situated under Beechen-Cliff, is in the gift of the Lord Chancellor.—The present incumbent is Dr. Richard Roberts, Master of St. Paul's School, London, and it is supported by public subscription. Here is divine service every Sunday, performed by the present curate of the Abbey. Adjoining is an Hospital belonging to it for Idiots, rebuilt in 1761.

There are besides several other places of divine worship in this city, viz. the Unitarian meeting-house, in Frog-lane; the Quakers meeting-house in Marchant's-court; the Baptists meeting-house, in Garrard-street; Lady *Huntingdon's* chapel, in Harlequin-row; a Moravian chapel, in Monmouth-street; a chapel in New King-street, for Methodists, or the followers of the late Rev. *John Wesley*; an Independent meeting-house in Argyle-buildings; a Meeting-house for the followers of the late *Mr. Whitfield*, opposite St. James's Parade; and a Roman-Catholic chapel, in Corn-street.

The principal COFFEE-HOUSES here are kept by Mr. Frappel, Mr. Pritchard, and Mr. Stroud. Mr. Frappel's is called the Grove Coffee-House, situated in Orange-Grove; Mr. Pritchard's, the Parade Coffee-House, fronts the North-Parade, and is thought to be one of the pleasantest in England, commanding a delightful view of the country; and the last adjoins the New Assembly-Rooms.

The publick *Grammar-School*, situated in Broad-street, was originally founded and endowed by King Edward VI. with
part

part of the land belonging to the dissolved religious houses. The present building was begun in the year 1752, and the first stone laid with great ceremony by the Right Worshipful the Mayor, attended by the Corporation, the several Companies, and a band of musick; on which is inscribed,

Auspicato furgat hocce Domicilium,
Ad humaniores Literas,
Bonasque Artes disseminandas,
Bene ac sapienter designatum.
Hoc jecit Fundamentum
FRANCISCUS HALES,
Hujus urbis Prætor,
Mentis Maii Diei 29^o
A. D. MDCCCLII.
Annoque Regnantis
GEORGH SECUNDI 25^o.

*May this edifice, so well and wisely
designed to propagate polite Literature,
and the liberal Arts and Sciences, rise
auspiciously. FRANCIS HALES,
Mayor of this City, laid the founda-
tion hereof on the 29th day of May, in
the year of our Lord 1752, and in the
25th Year of the Reign of GEORGE
the Second.*

This School is an elegant pile of building, very commodious for the reception of young gentlemen boarders, of whom the Master (the Rev. Nathaniel Morgan) has a great number, besides an annual salary from the Corporation.—The Rev. Walter Robins, LL. B. late Master of the School, conveyed the right of patronage to the rectory of Charlecombe to the Corporation, to be annexed to the Mastership of the said School for ever.

There is also a Charity-School in this city, which was first founded in the year 1711, and was begun, and for some years carried on by the interest and unwearied endeavours of that eminent pattern of learning and piety, *Robert Nelson*, esq; who engaged *Dean Willis*, (afterwards Lord Bishop of Winchester) and several other persons of distinction, to aid and assist him in this arduous and charitable undertaking. It was rebuilt by subscription, and the Corporation liberally contributed towards it, as well by their subscriptions, as by a grant of the ground on which the present School is now erected; and on the 12th of October 1721, the foundation-stone was laid by Mr. *Hoare*, on which is the following inscription:

GOD's Providence is our Inheritance.

Two Charity Sermons are annually preached at the several churches and chapels for this charity, besides many annual subscriptions and donations, which are placed in the hands of the following Trustees for its support:—

Sir John Miller, bart. *President*
 Mr. West, *Treasurer*
 Rev. Dr. Phillott
 Rev. Mr. Sibley
 Mr. Crook
 Mr. Alderman Coward
 Mr. Alderman Anderdon

Mr. Alderman Wiltshire
 Mr. Alderman Horton
 Dr. Lysons
 Mr. Charles Phillott
 Mr. George Chapman
 and
 Mr. Harry Atwood.

Mr. James Holdstock is the present Master of the School.

The objects of this charity are the children of honest and industrious parents, inhabitants of the city of Bath, and the number of boys and girls 100; who are completely clothed once in the year, and daily instructed in the principles of the Christian Religion, reading, writing, and accounts; the girls are also taught sewing, knitting, and housewifery business.—They are admitted upon the recommendation of Subscribers, between the age of six and twelve years, and at the age of fourteen are by the Trustees put out apprentices to trades, or placed out in such services as appear most suitable to their several capacities: a sum not exceeding six pounds being given as an apprentice fee with every boy, and forty shillings with every girl.

In January 1785 a subscription was set on foot by Henry Southby, esq; for establishing SUNDAY SCHOOLS in this city, for the children of the poor who have no other means of learning their social and religious duties. In a few weeks a sum sufficient was raised for the purpose, and at a publick meeting of the subscribers, the clergy of the city and several gentlemen were appointed a committee for conducting the business, and several resolutions were entered into; among which the chief were, That the appointment of the masters and mistresses should be in the Rectors of Bath and Walcot;—that the books of instruction should be such only as are in the list of those recommended by the Society for promoting Christian Knowledge;—that the children should attend divine service every Sunday evening at the Abbey church;—and that all children that offer from the parishes of Bath, Walcot, Widcomb, and Bathwick, shall be admitted into the schools.

The Sunday Schools now consist of upwards of seven hundred children, from which the scholars in the School of Industry are selected, and 120 are employed in reading, spinning, sewing, knitting, and making nets, under the inspection of four ladies and four gentlemen; all which children are decently and uniformly clothed, and make an appearance every Sunday at

church in the highest degree delightful to every Christian spectator, and strikingly bespeak the great utility of the institution.

To the care, patronage, and unremitting attention of the visiting ladies, and gentlemen, (particularly Major Brooke, the treasurer) may be justly attributed the flourishing state of the School of Industry; which merits the applause of the publick, and reflects the highest honour on the conductors.

It having been frequently lamented that, among the many excellent Charities established in this City, no place had been provided for the reception of Broken Limbs and other Sudden Accidents which require immediate relief;—The Rev. Dr. Griffith, the Rev. Mr. Sibley, Tho. Neate, Geo. Ramsay, and Wm. Anderdon, esqrs. began a subscription, hired a commodious house in King's-Mead-street; and, having provided all proper furniture and attendants, they opened it for the reception of patients on the 1st of January 1788, and called it

THE CASUALTY HOSPITAL,

at the same time associating themselves as trustees and managers of the institution. The seventh year being now expired, they have the pleasing satisfaction of acquainting its humane and liberal supporters, that the design of the institution has been hitherto happily attained; they having been enabled to receive into the house all proper objects that offered, amounting this year to 68; besides relieving 572, whose cases, though not of a nature to require admission, were such as to claim that immediate relief, which is at all times administered at this hospital.

N. B. As no personal application is intended to be made in behalf of this Charity, its Friends are hereby respectfully acquainted, that subscriptions and benefactions are received at Bladud Bank in Bond-street, and at the Casualty Hospital.

The *Theatre*, situated in Orchard-street, is established by royal patent granted to John Palmer, Wm. Keasberry, and Wm. Dimond, esqrs. The form of it, as far as the pit and boxes extend, is semicircular; the front on the sides of the stage are adorned with columns of the Doric and Ionic orders, and the ornaments are expressive of and bear analogy to the amusements of the place. It is furnished with a large lobby or waiting-room, with proper retiring-rooms, and at the top of the house

24-0359

Elevation of the West Front of the New Guild Hall at Bath, Som.

T. Baldwin del. J. G. 41

J. Collier sculp

house are ventilators. The whole was designed and executed by Mr. Palmer, architect; and it is universally allowed, for its size, to be as complete a theatre as any in Europe. The days of performance are in general *Tuesdays, Thursdays, and Saturdays.*

Messrs. Palmer, Keasberry, and Dimond, have also the lease of the Bristol theatre, for the term of the patent; so that they are enabled (by keeping their comedians together, who perform during the summer at Bristol three times a week, and every Monday during the Bath season) to employ a numerous and very respectable company;—and many instances have occurred where the London theatres have been indebted to Bath for their best performers.

At a little distance from the New-Assembly-Rooms, in Montpelier-Row, is a large and commodious *Riding-School*, kept by Mr. Dash, where Ladies and Gentlemen amuse themselves every morning, and are instructed in the art of horsemanship. The terms for those who learn to ride, and ride the managed horse, are three guineas for sixteen lessons, or 5s. 3d. a single lesson: Those whose horses are kept at livery here, are allowed to ride them in the school gratis.

Adjoining the Riding-School is an elegant and commodious *Tennis-Court*, which was opened for play in the year 1777.

At Ryles's Riding-School in Monmouth-street, Ladies and Gentlemen are also taught to ride; and may exercise their horses in his Ride at one guinea for the season.

The OLD GUILDHALL of this city, which was built after a plan of the celebrated Inigo Jones, was situated in the High-street, directly between the present Green-Market, and the Christopher Inn; but the Corporation finding this hall and its offices too small, and its situation very inconvenient for carriages passing through the city, came to a resolution to erect a new one, the first stone of which was laid by the Mayor, attended by the rest of the Corporation, Feb. 11th, 1766.

A total stop was put to this building 'till 1775, when fresh designs were made, and the building finished under the direction of Mr. Thomas Baldwin, architect.*

At the north and south ends are two wings 52 feet long each. The basement story consists of a noble kitchen, furnished with every necessary, and all other convenient offices.

* The elevation of the hall appears in the plate annexed.

The ground story consists of a vestibule, a justiciary-room, a drawing-room for the Mayor, town-clerk's office, deputy town-clerk's office, and common clerk's office, a withdrawing room for the jury, record-room, and lobby near the grand staircase for the Mayor's officers to wait in.

The principal story consists of a banquetting or ball room, 80 feet long, 40 feet wide, and 31 feet high, superbly finished and ornamented in the modern taste. On the west side of which is a drawing-room, used also as a council-room.

In the banquetting-room over one of the chimney-pieces is preserved a most curious and beautiful head of Minerva, (or, as some think, of Apollo) which was in the month of July 1727 dug up at the depth of 16 feet from the surface of the ground, in Stall-street, and is ranked amongst the most curious remains that have ever been discovered within this ancient city. It is of brass gilt, and of excellent workmanship; being part of a mutilated statue supposed to be still lying buried near the same spot. It originally had on it a crown probably of the mural kind, the holes by which it was affixed being still visible. With this head were found at the same time several coins of Marcus Aurelius, Maximilian, Dioclesian, Constantine, &c.

His late Royal Highness Frederick Prince of Wales, on account of the respect shewn him when at Bath, presented to the Corporation a magnificent wrought gilt cup and salver, which are used at all their publick entertainments.

The city is governed by the Mayor, six Justices, the Recorder, (Earl Camden) and Aldermen, besides 20 Common-Council; the number of Aldermen is not to exceed ten, or be less than four, and a Town-clerk. The present town-clerk is John Jefferys, esq; and Henry Edward Howse, esq; the chamberlain. From among the Common-Council, are yearly chosen two Bailiffs or Sheriffs, and two Constables. The representatives in Parliament for the city are elected by the Body Corporate; the present members are, Lord Vise. Weymouth, and Sir Richard Pepper Arden, master of the rolls.

A Court of Record is held at the Town-hall every Monday, which has cognizance of all personal actions within the said city or its liberties, in case the debt or damages exceed or amount to 40s. Of this Court the Town-clerk is the prothonotary, and the Serjeants at Mace for the time being are the attorneys. There is also a Court of Requests held every Tuesday at the Town-hall for the more easy and speedy recovery of small debts under 40s. within the city and liberties.

Two fairs are held here annually, viz. on the 14th of February, and the 10th of July. The principal markets are kept on Wednesdays and Saturdays, and plentifully supplied with every kind of provisions, generally at moderate prices. Fresh butter (equal to any in England) is brought in from the country every morning; and the butchers who live in the city supply the inhabitants with the best of meat every day in the week. The markets for fish are Mondays, Wednesdays, and Fridays, and are thought to excel those of any inland town in the kingdom, as well in the goodness as the quantity of the sea-fish brought to it, and the fresh water fish daily taken from the river Avon.

The New PUMP-ROOM is 60 feet long, 46 feet wide within the walls, and 34 feet high; each end having a semicircular recess, makes the length of the room in the center part about 85 feet. The inside of the room is set round with three-quarter columns of the Corinthian order, crowned with an entablature, above which rises a coving of 5 feet. In the recess at the west end is the musick gallery, and in that at the east end a time-piece given by the late Mr. Tompion, over which in a niche stands a marble statue of the late Mr. Nash, executed by the late Mr. Prince Hoare at the expence of the Corporation. In the center of the south side is the Pump, and on each side a fire-place.

In this room is the following elegant inscription and very pathetic apostrophe to the company, written by *Christopher Anstey*, esq; which is painted in gilt characters on the pump by order of the Governors of the General Hospital:—

THE
HOSPITAL

IN THIS CITY,

Open to the Sick Poor of every
Part of the World,

To whose Cases these Waters are applicable,
(*The Poor of Bath only excepted*)

Was first established and is still supported by the
Charitable Contributions of the
Liberal and Humane.

OH! pause awhile, whoe'er thou art,
That drink'st this healing stream;
If e'er Compassion o'er thy Heart
Diffus'd its heav'nly Beam,

Think on the Wretch whose distant Lot
This friendly Aid denies;
Think how in some poor lonely Cot
He unregarded lies!

Hither

Hither the helpleſs Stranger bring,
 Relieve his heartfelt Woe,
 And let thy Bounty, like this Spring,
 In genial Currents flow :
 So may thy Years, from Grief and Pain,
 And pining Want, be free ;
 And thou from Heaven that Mercy gain
 The Poor receive from thee.

And likewise the following curious and beautiful lines, framed and glazed, written by Dr. Harington, ſenior Phyſician to the General Hoſpital:

Scire Poſtulates Aquarum, uſumque Bibendi. VIRG.

I.

ALWHYLE ye drynke, 'mydſt Age and Ache ybent,
 Ah creepe not comfortleſſe beſide oure Streame ;
 (Sweet Nurſe of Hope) Afflyction's downwarde ſente,
 Wythe ſtyll ſmalle Voyce, to rouze from thrifteſſe Dreame ;
 Each wyng to prune, that ſhyſtythe everie Sprae
 In wytleſſe Flyghte, and chyrpythe Lyfe awaie.

II.

Alwhyle ye lave—ſuche Solace may be founde :
 “ When kynde the Hand, why 'neath its healyng faynte ?
 “ Payne ſhall recure the Hearte's corrupted Wounde ;
 “ Farre gone is that whyche feelethe not its Playnte.
 “ By kyndrede Angel ſmote, BETHESDA gave
 “ Newe Vyrtnes forthe, and ſelte her troublede Wave.”

III.

Thus drynke, thus lave—nor ever more lamente,
 Oure Springes but flowe pale Anguiſhe to befriende ;
 How fayre the Meede that followethe Contente !
 How bleſte to lyve, and fynde ſuche Anguiſhe mende !
 How bleſte to dye—when ſufferynge Faithe makes ſure,
 At Lyfe's high Founte, an everlaſtyng Cure !

Edgar.

There are three Banks eſtabliſhed in Bath ; the firſt, called the *Bath Bank*, was opened March 1, 1768 ; the firm Hobhouſe, Clutterbuck, Phillott, and Lowder, and is ſituated at the lower corner of Milſom-ſtreet. The ſecond was firſt eſtabliſhed in Wade's-Paſſage in May 1783, by Wm. and Robert Clement, ſince removed to High-ſtreet, and continued under the firm of Clement and Tugwell. The third, called *Bladud Bank*, is in Bond-ſtreet, and was eſtabliſhed March 25th, 1790 ; the firm Atwood, Abraham, Collett, Salmon, and Harris.

The

The Grove, near the Abbey-Church, is called Orange-Grove, from an obelisk erected by the late Richard Nash, esq; in compliment to the Prince of Orange, who came here for his health just before he married the Princess-Royal of England, and received great benefit from the waters. On this obelisk is the following inscription:—

In Memoriam
Sanitatis

PRINCIPI AURIACO
Aquarum Thermalium potu
Favente DEO,
Ovante BRITANNIA,
Felicetur Restitutæ.
M.DCC.XXXIV.

Thus translated :

In memory of the happy restoration of the health of the PRINCE of ORANGE by the drinking of the Bath Waters, through the favour of GOD, and to the great joy of BRITAIN. 1734.

On the other side of the New Bridge, erected by William Pulteney, esq; across the Avon, is a publick garden, called *Spring-Gardens*, very pleasantly and judiciously laid out by Mr. Pritchard, for the summer amusement and recreation of the inhabitants and company in this city, who may walk here the whole season on paying a subscription of three shillings.—Those who do not subscribe pay six-pence for admission, and receive a ticket that entitles them to any thing they choose of that value. Here are publick breakfasts and publick tea, attended with horns and clarionets, during the summer, the days uncertain; and public evenings occasionally, with illuminations, fire-works, &c. similar to the London Vauxhall.—[*The site of this garden is intended soon to be covered with buildings.*]

To the left of the New-Bridge is the Prison, a large and convenient building, 60 feet in front, and 80 in depth, with a spacious court-yard.

Within these last fifty years, the city of Bath has so considerably increased in size and the number of its inhabitants, that it is become one of the *most agreeable* as well as *polite* places in the kingdom:—owing chiefly to the elegant neatness of its buildings, and the accommodations for strangers, which are superior to those of any city in Europe.

Mr. Wood was reckoned one of the first architects of his time. His first step in the improvement of our buildings, was the beginning to build Queen-square, the foundation-stone of which was laid on the 27th of January 1729, and is a magnificent pile of building.—In this square is a pleasure ground encompassed by iron palisadoes, in the centre of which is an obelisk, 70 feet high, on which is the following inscription cut in marble:—

THE NEW BATH GUIDE.

*In memory of honours bestowed,
And in gratitude for benefits conferred in this city,
By his Royal Highness
FREDERICK, Prince of WALES,
And his Royal Consort,
In the Year 1738,
This Obelisk is erected by
RICHARD NASH, Esq.*

After the building of the Square, Mr. Wood (having secured the property of the ground for leasing to builders) planned several streets contiguous thereto; and on the 10th of March 1739, laid the foundation of the North and South Parades, Pierpoint-street, Duke-street, &c. which he lived to see completed: And some time before his death, which was in May 1754, he laid out the plan for erecting that beautiful circular pile of building, called the King's-Circus, the houses of which are built uniform, and consist of three orders, viz. the Doric, Ionic, and Corinthian, with every enrichment of each order. In the centre of this circle is a reservoir of water, arched over, and fed by two or three fine springs, which supply the whole neighbourhood. There are three streets which have a communication with the Circus, viz. Gay-street, Bennet-street, and Brock-street; the first of which leads to Queen-square, the next to the New Rooms and the buildings in Lansdown-road, and the latter to the Royal Crescent,* a noble pile, built in an elliptical form, with one order of Ionic pillars supporting the upper cornice, and commanding a beautiful and extensive prospect.

Since the Royal Crescent was finished, another elegant pile of buildings has been completed and inhabited, called Catherine-place, situated behind Brock-street, in a very airy and healthy situation; at the north side of this building is a new street called Rivers-street, and another called Burlington-street, at the top of which is a new range of buildings, called Portland-Place, consisting of several very large capital houses. Above which, to the left of the road leading to Lansdown, is another Crescent of elegant and spacious houses, called Lansdown-Place; and on the opposite side of the road, near Beacon-hill, is a third Crescent, called Camden-Place; all commanding prospects equally beautiful, if not as extensive, as any buildings in the kingdom.

* The Elevation of this Building may be seen in the annexed plate.

The Royal CRESCENT.

*In memory of honours bestowed,
And in gratitude for benefits conferred in this city,
By his Royal Highness
FREDERICK, Prince of WALES,
And his Royal Consort,
In the Year 1738,
This Obelisk is erected by
RICHARD NASH, Esq.*

After the building of the Square, Mr. Wood (having secured the property of the ground for leasing to builders) planned several streets contiguous thereto; and on the 10th of March 1739, laid the foundation of the North and South Parades, Pierpoint-street, Duke-street, &c. which he lived to see completed: And some time before his death, which was in May 1754, he laid out the plan for erecting that beautiful circular pile of building, called the King's-Circus, the houses of which are built uniform, and consist of three orders, viz. the Doric, Ionic, and Corinthian, with every enrichment of each order. In the centre of this circle is a reservoir of water, arched over, and fed by two or three fine springs, which supply the whole neighbourhood. There are three streets which have a communication with the Circus, viz. Gay-street, Bennet-street, and Brock-street; the first of which leads to Queens-square, the next to the New Rooms and the buildings in Lansdown-road, and the latter to the Royal Crescent,* a noble pile, built in an elliptical form, with one order of Ionic pillars supporting the upper cornice, and commanding a beautiful and extensive prospect.

Since the Royal Crescent was finished, another elegant pile of buildings has been completed and inhabited, called Catherine-place, situated behind Brock-street, in a very airy and healthy situation; at the north side of this building is a new street called Rivers-street, and another called Burlington-street, at the top of which is a new range of buildings, called Portland-Place, consisting of several very large capital houses. Above which, to the left of the road leading to Lansdown, is another Crescent of elegant and spacious houses, called Lansdown-Place; and on the opposite side of the road, near Beacon-hill, is a third Crescent, called Camden-Place; all commanding prospects equally beautiful, if not as extensive, as any buildings in the kingdom.

* The Elevation of this Building may be seen in the annexed plate.

The Royal Crescent

24 DE 59

An elegant row of houses is just finished to the west of the Royal Crescent, called Marlborough-Buildings; and behind the Crescent a new Square, called St. James's-Square, with streets at the upper corners called Park-street and Great Bedford-street, leading to Lansdown-Place. And at the entrance from London, are several new and capital piles of buildings, called *Grosvenor-Place, Kensington, Piccadilly, &c.*

In Grosvenor Buildings is now erecting a spacious Hotel with delightful Gardens, of near 14 acres, to the river, laid out in great taste for summer and winter amusements; built by a subscription of 250 persons, at 50l. each share, and called *Grosvenor-Gardens Vauxhall, and Hotel*. It is so far completed that company may be accommodated with breakfasts, afternoon tea, and dinners, on proper notice. Subscribers for walking in the garden pay 7s. 6d. the season; for bowling 3s. and for angling 3s. Pleasure-boats attend.

The plan of Mr. Baldwin, architect, for building, in a stile of great elegance, several new streets, a square, a circus, and crescent, in Bathwick meadows, the property of *the Baroness of Bath*, daughter of Sir Wm. Pulteney, bart. is going forward with great expedition; and there seems a probability that the whole design will in a few years be carried into execution. Argyle-buildings, Laura-place, Great Pulteney-street, Henrietta-street, Grove-street, Cheap-side, &c. are nearly finished, and almost all the houses inhabited.†

Sydney-Garden Vauxhall is situated at the termination of Great-Pulteney-street. It was opened for publick entertainment on the 11th of May, 1795. This pleasure garden was designed by Mr. Harcourt Masters, architect, in which he has displayed much taste and judgment. The stile is quite new, and exhibits the most pleasing variety. It is lett to Mr. Gale, who conducts it with great spirit and liberality. The terms of subscription for walking are 2s. 6d. for a month, 5s. for a quarter, and 7s. 6d. for a season. Non-subscribers for walking 6d. each, and tea is rendered at 6d. There are swings, bowling-greens, and cold baths; and also a Merlin swing in the labyrinth, a plan of which is sold at the bar at 3d. each. There are publick nights, during the summer, with musick, fire-works, and superb illuminations.

† For the names and situation of the streets, new buildings, &c. the reader is referred to the New Plan of the City, with all the new buildings, printed on a sheet of royal paper; sold by the publisher of this Guide, and at all the libraries.

IMPROVEMENTS *in the* OLD CITY of BATH.

In order to make the avenues and passages as commodious as possible, the Corporation procured in 1789, an act of Parliament for improving the old town, and for making five new streets:—

The first of these streets is intended to lead from Burton-street, near the General Hospital, to Stall-street.

The second, called Bath-street, leads from the Great Pump-Room in Stall-street, to the Cross-Bath; and is finished with a handsome colonnade on each side, of the Ionick order.

The third is to lead from the north-side of the Cross-Bath, to Westgate-street;

The fourth, from the south-side of the Cross-Bath, to a place or way called the Borough-wall; and

The fifth, from the west-side of Stall-street, near Bell-Tree-lane, to the Borough-wall.

And for the rendering more convenient and commodious several other streets, ways, and passages, and for improving the Pump-Rooms, and making Areas for preserving the Baths.

Since the passing of this act, the houses in Cheap-street have been rebuilt in a neat and elegant style, and the street rendered commodious for carriages, &c.

To defray the charge of these improvements, more than 80,000*l.* is to be expended, which the Corporation are empowered to borrow on their own estates, and on the credit of an additional half-toll on all carriages and horses, (except loaded waggons, carts, and horses coming to market) and a double Sunday's toll, on the turnpike-gates.

The act of parliament for paving, cleansing, and lighting the city is strictly adhered to; and a regular night-watch patrols the streets every half hour, to preserve the public peace.

A Society for the protection of persons and property, in this city and neighbourhood, from felons, forgers, receivers of stolen goods, cheats, swindlers, highwaymen, &c. called *The Bath Society of Guardians*, has been established these eight years past, by a voluntary subscription of the inhabitants of 5*s.* each annually, and from those in the suburbs of 7*s.* 6*d.* which entitles every subscriber to his expences in advertising, apprehending, and prosecuting offenders. Mr. Meyler, bookseller, in the Grove, is Secretary.

The Society instituted in this city *for the Encouragement of Agriculture, Arts, Manufactures, and Commerce*, is the first out of London in this kingdom. The number of subscribing members

members exceed three hundred, among whom are 23 noblemen, and 28 members of parliament.—The Earl of Ailesbury is the President, and Mr. Matthews the Secretary; at whose house (known by the name of Hetling-House, next the Hot-Bath Pump-Room) the meetings are held; and where any gentleman may have the Book of Rules and Orders, lists of Premiums and Members. This respectable Society has published seven large volumes in octavo of their correspondents' letters, chiefly on agricultural subjects, which are highly esteemed, illustrated with copper-plates; and may be had of any bookseller, price 39s. in boards.

The publick roads about Bath have been much improved within these few years, and the access to the hills, Claverton and Lansdown, (which was formerly very difficult) is now rendered safe, easy, and pleasant, either on horseback or in carriages. The air on these hills is very pure, and particularly beneficial to invalids, who ride to restore their health.

Lansdown is one of the most conspicuous and happily situated hills in the west of England, and famous for the number of sheep fattened by its delicate herbage. On this Down, on the 10th of August, is annually held a very large fair, noted for selling great quantities of fine cheese, horses, &c.; and on it the races are holden annually in April or May. From hence you have a fine view of the Bristol channel, city of Bristol, part of Wales, and a great part of Gloucestershire, Worcestershire, and Wiltshire; and there is one point of view where the cities of Bath and Bristol may be seen at the same time.

This Down takes its name from a Monument of free-stone, (as represented on the next page) erected on it by George Lord Lansdown, in memory of a battle fought here between the King's and the Parliament forces, on the 5th of July 1643, as explained by the inscriptions which follow. On the King's side, which was commanded by the Marquis of Hertford, the King's horse was so shaken, that of 2000 which were upon the field in the morning, there were not above 600 left after the action; occasioned by a regiment of cuirassiers commanded by Sir Arthur Haslerig, which were so completely armed, that they were called *the regiment of lobsters*. On the other hand the Marquis drove Sir Wm. Waller, the Parliament general, from his post, and compelled him to retire into Bath.

The following is on the South Tablet.

“In this battle, on the King’s part, were more officers and gentlemen of quality slain than private men; but that which would have clouded any victory, and made the loss of others less spoken of, was the death of Sir Beville Granville. He was indeed an excellent person, whose activity, interest, and reputation, were the foundation of what had been done in Cornwall; and his temper and affection so publick, that no accident which happened could make any impression on him; and his example kept others from taking any thing ill, or at least seeming to do so: in a word, a brighter courage and a gentler disposition were never married together, to make the most cheerful and innocent conversation.”——*Clarendon’s Hist.* vol. ii. p. 218, folio edition, and vol. iii. p. 282, octavo edition.

On the West side are trophies of war; on the East, the King’s arms, and those of Granville.

This monument stands within a square of 21 feet. Near it are still to be seen the remains of a fortification, thought to have been thrown up by the Saxons in 520, when they defended themselves against the victorious King Arthur.

Claverton Down is also a very pleasant and agreeable airing for invalids, by whom it is much frequented; it takes its name from a little village situated in the vale beyond it, and commands a delightful prospect of the city of Bath, and the vale between Bath and Bristol.—To the right as you ascend this Down, is a seat that belonged to the late Ralph Allen, esq; but now to the Rev. Stafford Smith, called Prior-Park, which commands a most beautiful and picturesque prospect of the vale beneath and the surrounding hills, the city of Bath being the chief object.

There are many other rides about this city,* more agreeable than the above downs in cold tempestuous weather, being sheltered by the hills on each side, viz. to the village of Kellston, the lower road to Bristol, the London road, and the new road from Lambridge to and beyond Swainswick.

These rides afford a great variety of picturesque views of hills clothed with hanging woods, fruitful valleys, and the Avon flowing beneath in a serpentine direction.

In the street leading to Claverton-Down, is a fine Cold Bath, kept by Mr. Greenaway, which is supplied by a spring of excellent water.

* For a particular description of the situation of the villages near Bath, we must refer the reader to a Map of five miles round the city, sold by the publisher of this Guide, and at all the libraries.

The following are the Regulations which the Chairmen of Bath are subject to, by Act of Parliament.

The Mayor and two Justices shall license all, or any person or persons who shall carry any glass chair, or bath chair, within the city of Bath, or the liberties thereof; the charge of every such licence is not to exceed *three shillings*, which is to be paid by every respective chairman, besides the duty of 5s. for the stamps; and the number of glass and bath chairs shall not be under 70.* The said licence shall be granted for one year, from its date, and no longer.

The chairs thus licensed are to have a mark of distinction, by figure or otherwise, on the back or most conspicuous part of every chair. And any person presuming to carry any glass or bath chair within the city of Bath, or liberties, without such leave or licence, for every such offence shall forfeit *thirteen shillings and fourpence*. And the chairmen shall keep such stands or places with their chairs, as the Mayor and Justices shall order, direct, and appoint; and if any chairman refuse to obey such orders, he shall forfeit *ten shillings*; and upon complaint, the justices may suspend any chairmen from working, for any time not exceeding forty days. Every chairman, on taking out his licence, to give in his place of residence to the town-clerk, and in case of removal, he is to give him notice thereof, and on neglect shall forfeit 20s.

If any person shall refuse or neglect to pay any chairmen the money justly due for carrying in their chair; or shall wilfully cut, deface, or break, any such chair, the Mayor and Justices may on complaint thereof, grant a warrant to bring before them the person against whom such complaint shall be made, and upon proof made by one or more witnesses upon oath, to award reasonable satisfaction to the parties aggrieved; and upon refusal to pay and make such satisfaction, to issue out warrants of distress, to levy the same on the offender's goods and chattles; and for want of distress, to commit the party or parties so offending to prison for one month, or until such satisfaction be made; such penalty to be applied to and for the use of the poor of the parish.

Any gentleman may use a chair of his own, and appoint his own chairmen, entering the same in the office of the clerk of the peace, but such chairmen must not carry any other fare than such person and his family so hiring them, on pain of forfeiting for every such offence *ten shillings*.

All prosecutions for any offence must be commenced within three months after the offence; and all disputes are to be heard and finally determined by the Mayor, Aldermen, &c. who attend at the Guildhall every Monday at eleven o'clock in the forenoon, for this and other purposes.

* The present number of licensed chairs is upwards of 160.

CHAIRMEN'S FARES, as settled by the Magistrates.

	s.	d.
For carrying one person any distance not exceeding 500 yards	0	6
Above 500 and not exceeding 1173 yards	1	0
Beyond 1173 yards, and not exceeding one mile	1	6
Beyond one measured mile, and not exceeding in the whole one mile and 586 yards	—	2 0
Not exceeding one mile and 1173 yards	—	2 6
Not exceeding two measured miles	—	3 0
And for every 586 yards beyond	—	0 6

Any person may detain the chairmen in every fare, without paying anything for it, as follows: viz.

	minutes		minutes
In a sixpenny fare, — —	10	In a two-shilling fare — —	25
In a twelvepenny fare, —	15	In a half-crown fare — —	30
In an eighteenpenny fare, —	20	In a three-shilling fare —	35

And in every other fare or quantity of ground constituting an additional fare, any further time not exceeding in each additional sixpenny fare as above, five minutes.

All fares to be charged double after twelve o'clock at night. And instead of 500 yards, 300 only is a sixpenny fare on hilly or ascending ground, whether upward or downward; but where the fare begins on plain ground, and ends on an ascent, or begins on a descent, and ends on plain ground, the chairmen must carry the full space of 500 yards.

Chairmen to be paid 6d. for each extra quarter of an hour's waiting. Chairmen demanding more for their fare than they are entitled to, or refusing or declining to carry any fare when called on, or using any abusive or insulting language, shall forfeit 20s. or be suspended from using their chair for any time not exceeding 40 days.

The Mayor and two Justices to direct the measurement of any distances in dispute; the expence of which to be paid by the chairmen if the distance be less than they charge, and if more, by the person they carry.

The ground that is deemed hilly or ascending, is as follows:

From the union of the four roads at the north end of Belmont-Row, ascending northward towards Lansdown-Place, and Camden-Place, and parts adjacent.

From the south-side of Burlington-House, northward; from the road at the north-east corner of St. James's-Square, northward; and from the London road to Gay's-place, &c. northward.

From the New Assembly-Rooms and parts adjacent, up, to, and along Russell-street, to and into Burlington-street, &c. northward.

From the Angel inn, at or in Holloway, up or along the public roads there, southward.

From

From Gay's mill near Widcomb turnpike-gate, towards Lyncomb and parts adjacent fouthward.

From the lower gate going to Prior-Park, up Widcomb-hill, eastward.

From the corn-mill at the bottom of the hill leading to Prior-Park, to or towards Prior-Park house, and parts adjacent.

TABLE OF DISTANCES.

From the Front Door of Mr. HEAVEN'S ROOMS,

	Yards.
To the north-east corner of Queen-square, through Bridewell-lane, is	508

To the first house in Milford-street, on the left hand, is	573
To the first house in King's-mead-street, is	700

A concise Description of the City of BRISTOL, and the HOT-WELLS, also the MONUMENTS of ANTIQUITY, and GENTLEMEN'S SEATS, in the Environs of Bath.

THE City of Bristol is 13 miles from Bath, and is the second city in England for trade, wealth, and number of its inhabitants. It lay in two counties, [Somerset and Gloucester] before it was made a city and county of itself, which was in the reign of Edward the Third.

The Cathedral, which is situated in College-Green, was formerly the collegiate church of St. Augustine's Monastery; but when dissolved by Henry the Eighth, and erected into the see of a Bishop, he applied its revenues to the maintenance of a Bishop, Dean, Prebendaries, &c.

There are in this city eighteen churches; the chief is *St. Mary Redcliffe*, without the walls, built in the reign of Henry VIth by *William Cannings*, esq; alderman of the city; to whose memory there is a very fine monument in it, recording, besides,

E

his

his great benefactions to the city. This is a magnificent structure, in the Gothick taste, the workmanship so exquisite, the roof so artificially vaulted with stone, and the tower so high, that we may say with Camden, it is the finest parish-church in the kingdom. The altar consists of three fine pictures, painted by Hogarth; and over it is a fine painting by Fresham, presented by Sir Clifton Wintringham, bart. representing our Saviour raising Jairus's daughter from the dead.

In the centre of Queen-Square, (which is as large as any square in London, except Lincoln's-Inn) is a curious equestrian statue of King William the Third, cast in copper, standing on a base and pediment of Portland stone, and reckoned a fine piece of workmanship. On the north side is the custom-house, and in the middle are many pleasing walks shaded with trees.

In Corn-street is a regular Exchange, built entirely of free-stone by the late Mr. Wood, architect of Bath, with four entrances into it, and rooms for brokers, underwriters, &c. The first stone was laid in 1740, and it was opened in September 1743. This structure, with spacious apartments at the entrance, one for a tavern, the other for a Coffee-House, is reckoned the completest of its kind in Europe.

The Quay, which is more than half a mile in length, is thought to be the most commodious in England.

Here are besides many other capital publick edifices, and numerous charitable institutions highly deserving notice; but our narrow limits will not permit us to describe them particularly. We shall therefore only observe, that there are seventeen hospitals, schools, and alms-houses, endowed by different people; but the greatest benefactor was Mr. *Edward Colston*, a Bristol merchant, whose extensive charities are not perhaps to be equalled by any person; his name indeed is an honour to humanity, and his good deeds will be held in everlasting remembrance.

About a mile and a half from this city is the *Hotwells*, well known for the efficacy of its water; which is a specifick for the dysentery, spitting of blood, consumptions, coughs, diabetes, &c. and is also excellent in inflammations, and scorbutic cases, being impregnated by the lime-stone quarries through which it runs with a soft alkaline quality. The spring rises perpendicularly out of the rock in the sloping bank of the river *Avon*, between high and low water-mark, where the river makes its entrance between those stupendous cliffs of rocks, which seem to have been torn asunder by the violence of an earthquake.

The season for drinking the water is from March to September, when the place is much frequented by the nobility and gentry; two Assembly-Rooms are erected contiguous to the Wells, where they have balls, concerts, publick breakfasts, &c. during the season. Here are many excellent lodging-houses, as well as at the delightful village of Clifton, on the hill above.

Beyond the Wells are tremendous rocks, (known by the name of St. Vincent's Rocks) extending a vast way on each side the river Avon, where is found in great abundance that beautiful fossil called Bristol stone.

About five miles from Bristol is Lord Clifford's elegant house and gardens, at King's-Weston, in the neighbourhood of which is one of the richest, most picturesque, variegated, and extensive prospects in the kingdom; commanding, at one view, the Bristol Channel, the mouth of the rivers Severn and Avon, the counties of Gloucester, Somerset, Wilts, and a vast line of the Welch coast and counties.

FARLEY-CASTLE, SOMERSETSHIRE,

Six miles from Bath.

At what time this castle was erected, or who was its builder, is not certainly known. If one may judge from the extent of its ruins, it seems surprising so little should be said of it in history. The first account of it is no farther back than the 16th of Edward the Third, at which time Farley appears to have been the property of Lord Bergherth; it was sold by his granddaughter, the sole heir, with other estates, to Robert Lord Hungerford. The present proprietor is — Frampton, esq.

The chapel in this castle consists of a single aisle, the ceiling of which is ornamented with (what was once) a fine painting of the resurrection. This chapel was the burying-place of the Hungerfords, and many other principal persons. Here is a very handsome monument in the recess, representing a man and his wife of the Hungerford family carved in white marble, recumbent on a black marble slab. In a vault beneath the chapel, to which the descent is from without, are six leaden coffins exactly resembling those inclosing Egyptian mummies. In the chapel stands a chest of old armour, brought from the castle, on opening of which were found three original letters written by Oliver Cromwell; two of them, it is said, were lent to a gentleman who never returned them, the third is preserved in a frame by the woman who shews the chapel, and the following is a copy:

"SIR,

"I am very sorry my occasions will not permit me to return to you as I would. I have not yet fully spoken with the gentleman I sent to wait upon you; when I shall do it I shall be enabled to be more particular, being unwilling to detain your servant any longer. With my service to your Lady and family, I take leave, and rest
Your affectionate servant,

"July 30, 1652.

O. CROMWELL."

"For my Honnord Frind Mr. Hungerford the Elder, These."

STANTON-DREW, SOMERSETSHIRE,

Is eight miles from Bath. At this place is a piece of antiquity, supposed to be the remains of a druids' temple, much in the same form as that at Stonehenge, consisting of a circle of large pillars, about six feet high, each of which seems to have made a diameter of 90 paces, though there is no appearance of a ditch. The remains of this monument, among the common people, bears the name of a Wedding, from a tradition, that as a bride was going to be married, she and the rest of the company were changed into pillars of stone.

BOW-WOOD, WILTSHIRE,

The seat of the Marquis of LANSDOWN.

This elegant seat is 18 miles from Bath, in the London road to Calne; it has within these few years been very much enlarged, and the park made very extensive, in which is an elegant mausoleum erected to the memory of the late Earl of Shelburne, who is interred there. A fine piece of water has been lately made in it, and the whole has undergone many other splendid improvements.

BADMINTON, GLOCESTERSHIRE,

The seat of his Grace the Duke of BEAUFORT,

Is about 13 miles from Bath. The mansion-house is very noble, and furnished with a number of fine family and other paintings. The park is very extensive, the walks extremely pleasant, and the gardens elegant. When King William III. passed that way, he said to the Duke at that time, that he did not wonder he never came to court, as he had so stately a palace of his own.

About a mile from the Duke of Beaufort's, upon the top of the hill, in the parish of Little Sodbury, there is a large square camp very perfect, supposed to have been made in the civil wars, containing about 12 acres within the fortification; it is
double

double ditched, is very deep, and in some places 40 feet wide, and the distance between the two ditches 80 feet. Part of the camp extends into the parish of Old Sodbury; and about half a mile from hence, in the parish of Horton, is a lesser square camp of eight acres, singly ditched. From both these camps are very fine prospects over the vale of Berkley, and the river Severn.

CORSHAM-HOUSE, WILTSHIRE,
The seat of PAUL METHUEN, esq.

This edifice is situated ten miles from Bath, and four from Chippenham, in a most agreeable part of Wiltshire. The palace of Ethelred, one of the Saxon Kings, and after the Conquest, the retiring place of the Earls of Cornwall, stood near the site of the present mansion, which appears from an inscription on the south front to have been built in the year 1582. In the last century it was one of the seats of Sir Edward Hungerford. It has been much improved by its present proprietor, who has added an apartment 70 feet long, 24 feet wide, and 24 high, for the reception of his pictures, which are reckoned the finest collection in the west of England. The park and gardens afford a variety of picturesque and beautiful prospects.

LONG-LEAT, WILTSHIRE,
The Seat of the MARQUIS of BATH.

This noble seat is 17 miles from Bath, in the road to Stourton; it is an ancient and magnificent structure, and for the size and number of apartments is equal perhaps to any house in England. The paintings in general are tolerably good, especially a head of the unfortunate Jane Shore; this picture, indeed, is worthy of admiration, not so much for its execution or design, as for the beauty, humility, and resignation, which are divinely worked in the countenance.—This seat has been greatly improved by the celebrated Mr. Browne; the park is very extensive and well planted, the water pleasingly disposed, and the whole forms a scene of great beauty and magnificence.

STOURHEAD, or STOURTON, WILTSHIRE,
Seven miles from Longleat,
The Seat of Sir RICHARD COLT HOARE, bart.

This seat (which is 25 miles from Bath) is not large, yet has an air of grandeur, and is well designed for pleasure and convenience. In the drawing-room is a very curious cabinet, which formerly belonged to the famous Pope Sextus Quintus, on
which

which are paintings of the Pope and others of the Peretti family, the last of whom was a nun, who gave it to a convent at Rome, from whence Mr. Hoare purchased it. In this and the other apartments are a number of fine paintings, by the first masters.

Opposite the west front of the house is a lawn of considerable extent, on each side of which are planted rows of Scotch firs, and at the end is an obelisk, 100 feet high, encircled by a range of elms. From the obelisk, through an avenue, you discover a most enchanting prospect of a pavillion, at the foot of which is a fine piece of water, and over it is a bridge, formed of one arch wonderfully light, and easy of ascent. Leaving this bridge, you enter into a shrubbery, which leads along the confines of the river, and brings you to a most romantick grotto, in one apartment of which to the right are these lines:—

“Nymph of the Grot, these sacred springs I keep,
 “And to the murmur of these waters sleep;
 “Oh! spare my slumbers, gently tread the cave,
 “And drink in silence, or in silence lave.”

The figure of the nymph herself is elegantly formed, and the waters tinkling round her, with the gloom and stillness of the place, have an effect that is pleasingly melancholy to the imagination. Quitting this grotto, which is in the truest stile of rural simplicity, you next ascend a flight of steps into the shrubbery, which leading along the borders of the river, brings you to the Pantheon, where you see at one view the choicest assemblage of beauties. In the front is an elegant formed piece of water, with the cavern of Neptune, a temple dedicated to Flora; and on the right an ancient cross in imitation of Egyptian granite, a handsome stone bridge, the Temple of Apollo, and a profusion of groves properly diversified and adapted to their situations.

From the pleasure ground you enter a gloomy wood, which leads you by a gentle ascent to a rustick pile called the Convent, in which is a good painting dug out of the ruins of Glastonbury-Abbey, and an ancient drawing of our Saviour. From the Convent you descend into an extensive wilderness, which leads to the summit of the brow on which Alfred's Tower is placed; the building is triangular, of modern date, and built of brick; the height is 155 feet, and the number of steps 321. Nothing can be conceived more striking than the prospects from every side of this structure, round one turret of which, for the benefit of the view, a gallery has been railed in, in the securest manner. Over the portal on the outside is the following inscription:

“Alfred

“ Alfred the Great, A.D. 879, on this summit erected his standard against Danish invaders: to him we owe the origin of juries, and the creation of a naval force. Alfred, the light of a benighted age, was a philosopher and a christian, the father of his people, and the founder of the English monarchy and liberties.”

From Alfred's Tower to the house, the eye is charmed with a number of delightful views; and in many other parts of the garden are interspersed, temples, statues, and other buildings, which altogether display the most exquisite taste.

FONTHILL, WILTSHIRE,

The seat of WILLIAM BECKFORD, Esq.

This seat was in the time of the late William Beckford, esq; (twice Lord-Mayor of London) burnt down on Feb. 12th, 1755, when nearly finished; but it is now rebuilt very magnificently. The loss was computed at 30,000l. The whole building is of stone dug out of quarries not half a mile distant; the plan is elegant and superb. There are many remarkable fine marble chimney-pieces, by Ryssack and other artists, and in the chief rooms are a number of valuable pictures. The grotto and the gardens are very beautiful, and the shrubbery continues round the park nearly three miles in a regular zig-zag. The river is not inelegantly shaped, and the whole conveys the idea of care and cultivation.

WARDOUR-CASTLE, WILTSHIRE,

The seat of Lord ARUNDEL, 5 miles from Fonthill.

This mansion was upwards of ten years building; it is truly magnificent, and the grounds around it are disposed of to great advantage. The ruins of the old castle, which is a mile distant from the new house, has still the appearance of ancient grandeur.

This castle, in the time of the civil wars, was remarkably defended by Lady Arundell, daughter of Edward Earl of Worcester, she having held out the castle with only 25 men against the parliamentary army of 1300, and surrendered it at last only on honourable terms.

The house contains a great number of fine pictures, painted by the best masters, particularly one of our Saviour taken from the cross, by Spagnolett; and another of Lady Arundell, who defended the castle. The pleasure grounds, shrubbery, groves, and woods, are elegantly formed; the beauties of the terrace walk

walk have met with general admiration, and altogether conveys the most pleasing and picturesque ideas.

CITY of WELLS, 20 miles from Bath.

This city has one of the finest cathedrals in England; the west front is very magnificent, and has ever been admired for its antient imagery, being an entire pile of statues; but the taste being rudely Gothick, it does not strike a common observer with either elegance or simplicity. The outside carries a venerable and awful look, and the inside is carefully attended to, as well with respect to neatness as conveniency.

Two miles from this city, in one of the Mendip hills, is the famous cavern called WOOKEY-HOLE, one of the greatest natural curiosities in England. In this subterraneous cavern are a number of incrustations, representing different figures, particularly the tomb, as they call it, of the Old Witch of Wookey, who is said to have resided here.

About three miles from Wells, are the stupendous *Cliffs of Cheddar*, well worthy observation.

Six miles distant from Wells, are *the ruins of Glastonbury Abbey*, formerly the richest and most magnificent in the world: the time of its foundation is not certainly known, but it was most liberally endowed by King Ina, who built the great church; it was likewise benefited by Edward the Elder, Eldred, Edgar, and other Saxon Kings and Nobles; but at the Conquest, King William stripped it of several of its possessions, and bestowed them on his followers; and in 1083, made one Tustlin, a Norman, abbot thereof. The abbot's kitchen is now more entire than any other part of the building, and was probably of more modern construction.

On a hill near the town, was a church dedicated to St. Michael, where Richard Whiting, the last and most celebrated Abbot, and whose hospitality was so great, that he often entertained 500 horsemen at a time, was hanged by order of Henry VIII. for having let fall some hasty expressions when the King's Commissioners arrived to seize upon his revenues. The walls of the church are fallen to decay, but the tower is still standing, which is called Glastonbury Torr, and serves as a land-mark.

PIERCEFIELD, MONMOUTHSHIRE.

This seat is about twenty-six miles from Bath, just across the Severn, and near the town of Chepstow; it possesses the most beautiful

beautiful and magnificent scenery, take it in all its parts and varieties, of any place in the kingdom. From a small shrubbery you are led to a spot railed in, called from its frightful eminence the Lover's Leap, the perpendicular height of which is computed at 300 feet. It commands the conflux of the Wye and the Severn, and looks down the latter to the Bristol channel, while stupendous rocks, immense woods, distant prospects, and all the softer beauties of elegant improvements, render Piercefield a scene that fills the beholder with the most ravishing admiration. Strangers are permitted to see it one day in the week only.

About six miles from PIERCEFIELD is the ABBEY of TINTERN, a most beautiful ruin situated in the bottom of a vale. Never did the eye behold a more venerable object than this Abbey presents on the entrance at the great door. Nothing remains now but the walls, some of the arches, and the stone casements of the windows; but the charming simplicity of the whole, with the native verdure of the turf, strike the delighted fancy; while festoons of evergreen tendrils, climbing through the interstices of the Gothic pillars, throw an awful solemnity round its head. This Abbey was founded by Walter Fitz-Richard de Clare, Lord of Caerwent and Monmouthshire, in the year 1113.

Strangers from London who visit Bath may have an opportunity when they return, (and they would travel only 15 miles out of the way) of seeing the fine seat and woods of Lord Bathurst, at Cirencester; the city of Oxford, that seminary which affords such a variety of elegant gratifications; and would be within a few miles of the Duke of Marlborough's superb palace at Blenheim, and the fine gardens of the Marquis of Buckingham at Stow. Or if they would like to take a different route through Salisbury, which is only 14 miles farther than the direct road, they might entertain themselves by visiting that wonderful curiosity Stonehenge, near which is the Duke of Queensbury's seat; and two miles from Salisbury is Wilton-house, the seat of the Earl of Pembroke, in which are a greater number of antique busts, statues, and capital paintings, by the best masters, particularly Vandyke; than in any house in England. In the neighbourhood of Salisbury is likewise the antient seat of Lord Radnor, a house very well worthy observation.

The delightful seats of Mr. Bampfylde at Hestercomb; Lady Tynte, at Halsewell; and the Earl of Egmont, at Enmore-Castle; (all near Bridgwater) are well worthy the time and at-

ention

tention of a curious traveller:—The gardens and rural beauties at Hestercomb are the striking object. An hermitage in it, with the figure of an old witch painted in the center pannel, occasioned the following genteel compliment from the late Dr. Langhorne:

“O’er BAMPFYLDE’S woods by various nature grac’d,
“A *witch* presides! but then that *witch* is *taste*.”

Enmore-Castle is remarkable for the peculiarity of its building, being a quadrangle of dark-coloured stone round a court; it is surrounded by a dry fosse 40 feet wide and 16 deep, from which are openings to all the offices, stables, &c. under the lawn.

Halfewell-House is beautifully situated, in the middle of an ornamented park, about two miles from Enmore. The rides in this park are very extensive, and command a great variety of beautiful prospects, and rich landscapes.

THE WATER of MIDDLE-HILL SPA,

Situated near the London road, in the village of Box, discovered in 1783, at the depth of 80 feet, has been found serviceable in cures wherein purging sulphureous waters are recommended; such as foul eruptions on the skin, worms, acidity of the stomach with a costive habit, bilious complaints, scrophula, inflammations of the eyes, &c.

THE MINERAL WATER of HOLT SPRING

Has been celebrated upwards of 100 years for its healing virtues, in scrophulous, scorbutic, inflammatory, and bilious cases, in all tumours, (when broken into running sores) and even in leprosy, by drinking and bathing.

Holt is a pleasant village, nine miles from Bath; in the vicinity of Bradford, Trowbridge, and Melksham.

HAVING thus given a concise description of the city of Bath, and its environs, as well as of such particulars as were thought more immediately interesting to those who visit this city, the following short account of

RICHARD NASH, Esq;

the person to whom it is peculiarly indebted for its present flourishing state, will, it is presumed, add to the entertainment of every reader. The annexed portrait of him is taken from a
picture

picture in the Town-hall, painted by Mr. Hoare, and reckoned by every person that knew him to be a very great likeness.

RICHARD NASH, esq; was born in the town of Swansea, in Glamorganshire, on the 18th of October, in the year 1673. His father was a gentleman whose principal income arose from a partnership in a glass-house; his mother was niece to Col. Poyer, who was killed by Oliver Cromwell, in defending Pembroke-Castle against the rebels.

He was educated under Mr. Mattocks, at Carmarthen School, and from thence sent to Jesus-College, Oxford, in order to prepare him for the study of the law. The first method he took to distinguish himself at College was not by application to study, but his assiduity for intrigue. His stay at College was, on that account, but of short duration.

The next step he took was, to purchase himself a pair of colours in the army, which situation he thought best adapted to gratify his inclination for gallantry. He soon became disgusted with the life of a soldier, quitted the army, and entered his name as a student in the Temple-books, leading a gay life some years about town, till his genteel appearance, his naturally polite, manly behaviour, and above all, his great goodness of heart, gained him the acquaintance and esteem of several persons qualified to lead the fashion by birth and fortune.

About this time, (the latter end of the last century) the city of Bath was reckoned one of the poorest cities in England; the buildings were extremely mean, and the inhabitants rude and unpolite. There were neither ball-rooms, nor places of amusement. A few families of distinction resorted here for about six or seven weeks in the spring; and when the company were numerous enough to form a dance, they repaired to the Town-hall, and Captain Webster, who was a resident at Bath in the year 1703, took upon himself the regulation of the amusements. Ten couple were then thought a large assembly; and the gentlemen paid only half-a-guinea subscription. The accommodations were very indifferent, few houses being capable of receiving any family of distinction; and even in the memory of several persons now living, there was only one sashed house in the city, which is now standing in Bell-tree-lane; and though once the occasional residence of the gay, the opulent, and even noble visitors, is at present a lodging for the poorest of its inhabitants, and will shortly be pulled down for the health and convenience of the neighbourhood. In the state thus described was

Bath,

Bath, when Mr. Nash first visited it, with several others of his friends; he was introduced to Capt. Webster, and an intimacy taking place between them, he was called the Captain's aid-du-camp. The inhabitants, as well as persons of quality, took every occasion to shew their respect for Mr. Nash; and on the death of Captain Webster, about the year 1710, he was unanimously elected to that seat of government which he so gloriously filled upwards of fifty years.

The band of musick (consisting of only five indifferent performers) used to play in the Grove every morning and evening under large trees, which were cut down about forty years since. But soon after the Pump-room was built, the physicians solicited Mr. Nash to lead the company there, which he did, and instantly set on foot a subscription for a good band of musick.—A few years after, Mr. Thomas Harrison erected [the present Lower] Assembly-Rooms for the reception of the company; and Mr. Nash had the pleasure (the greatest he could enjoy) of seeing the city of Bath flourish in so rapid a manner under his administration, as to be able to vie with any city in Europe, in the politeness of its amusements, and elegance of its accommodations.

Mr. Nash's pride discovered itself by no marks of dignity. He was content with being distinguished only by the ornamental ensign of a WHITE HAT; a symbol of the candour of his mind. He was a most prudent legislator, and more remarkable even than *Solon* or *Lycurgus*; as he at once established and authorised whatever laws were thought serviceable to the city, and grateful to strangers who made it their residence.

The following piece of humour was published by him, and hung up at all the publick places of amusement:—

RULES, by general consent determined.

1. That a visit of ceremony at coming to Bath, and another at going away, is all that is expected or desired by ladies of quality and fashion,—except impertinents.
2. That Ladies coming to the ball appoint a time for their footmen coming to wait on them home,—to prevent disturbance and inconvenience to themselves and others.
3. That Gentlemen of Fashion, never appearing in a morning before the Ladies in gowns and caps, shew breeding and respect.
4. That no person take it ill that any one goes to another's play or breakfast, and not to theirs,—except captious by nature.

5. That

5. That no gentleman give his ticket for the ball to any but gentlewomen,—— Unless he has none of his acquaintance.

6. That gentlemen, crowding before ladies at the ball, shew ill manners; and that none do so for the future,—except such as respect nobody but themselves.

7. That no gentleman or lady take it ill that another dances before them;—except such as have no pretence to dance at all.

8. That the elder ladies and children be content with a second bench at the ball, as being past, or not come to perfection.

9. That the younger ladies take notice how many eyes observe them.—N. B. This does not extend to the *Have-at-alls*.

10. That all whisperers of lies and scandal be taken for the authors.

11. That all repeaters of such lies and scandal be shunned by all company,—except such as have been guilty of the same crime.

N. B. *Several men of no character, old women, and young ones of questioned reputation, are great authors of lies in this place, being of the sect of levellers.*

Some time before Mr. Nash's decease, Nature gave warning of his approaching dissolution: The worn machine had run itself down to an utter impossibility of repair; and he died at his house in St. John's-Place, on the 3d of February 1761, aged 87 years, sincerely regretted by every inhabitant of this city, to which he had been so long and so great a benefactor.

In three or four days after his decease, his corpse was conveyed to the Abbey-Church, with great solemnity.—About five the procession moved from his house: the charity-girls, two and two, preceded; next the boys of the Charity School, singing a solemn occasional hymn; next a large band of musick, founding at proper intervals a dirge; three clergymen immediately preceded the coffin, which was adorned with fable plumes, and the pall supported by the six senior aldermen; the masters of the assembly-rooms following as chief mourners. The crowd was so great, that not only the streets were filled, but even the tops of the houses were covered with spectators.

No Monument was erected for him in the Abbey-Church, where he was buried, till the year 1790; and then by subscription of a few individuals, set on foot by a Physician of the first eminence in this city,* by whom the following elegant monumental-inscription was written:

ADESTE

* Dr. Harington.

THE NEW BATH GUIDE.

ADESTE O CIVES, ADESTE LUGENTIS!

HIC SILENT LEGES

RICHARDI NASH, ARMIG.

NIHIL AMPLIUS IMPERANTIS;

QUI DIU ET UTILISSIME

ASSUMPTUS BATHONIÆ*

ELEGANTIÆ ARBITER

EHEU!

MORTI, (ULTIMO DESIGNATOR)

HAUD INDECORE SUCCUBUIT,

ANN. DOM. MDCCLXI, ÆTAT. SUÆ LXXXVII.

BEATUS ILLE QUI SIBI IMPERIOSUS!

If social virtues make remembrance dear,
 Or manners pure on decent rule depend;
 To *his* remains consign one grateful tear,
 Of Youth the guardian, and of All the friend.
 Now sleeps Dominion; here no Bounty flows;
 Nor more avails the festive scene to grace;
 Beneath that Hand which no discernment shews,
 Untaught to honour, or distinguish place.

Under this inscription is cut in marble, the arm of Death striking his dart at a falling crown and sceptre, with the motto

Æquâ pulsat manû.

HOR.

The immediate successor of Mr. Nash in the office of Master of the Ceremonies, was Mr. Collett, who did not continue to reign long, before Mr. Derrick was chosen to that office, and kept it, notwithstanding the great opposition he met with, till his death, which was on the 28th of March 1769; when there were two candidates to succeed him, viz. Mr. Brereton and Mr. Plomer. Each of these gentlemen was powerfully supported by the company then at Bath; a paper war was a long time continued; a poll demanded and carried on, in which each claimed a superiority of numbers,† and both acted for one night as Master of the Ceremonies; nor can we pretend to say how far discord and opposition might have been carried, had not a reconciliation been effected by a very respectable committee selected from the friends of each party, who unanimously agreed to allow each candidate a ball, and equally to divide the surplus

* Tacitus de Petronio Arbitr.

† Every subscriber to the balls, whether lady or gentleman, resident at Bath, has a right to vote for Master of the Ceremonies.

of that year's subscription, amounting to near 500*l.* between them, on condition that they resigned their pretensions to the Mastership of the Ceremonies, which they consented to:—And Capt. WADE, nephew to the late General Wade, was appointed to that office, and officiated at a numerous and splendid ball on the 18th of April 1769, to the great satisfaction of all the company; who instantly opened a subscription to present a gold medallion to the Captain, to be worn by him as a proper mark of distinction.

Mr. Wade resigned his office on the 8th of July 1777; and no less than seven candidates immediately started to be his successor. The contest was, however, at last left between William Brereton, and William Dawson, esqrs. and it being the wish of their friends to preserve the peace and harmony of Bath, it was proposed, at several meetings of the frequenters of both Rooms, that Mr. Brereton should officiate at the Lower, and Mr. Dawson at the New Rooms; and accordingly the last week in October following, they were both elected to that office. Mr. Brereton continued in the office about three years, when he declined it, and Richard Tyfon, esq; was elected in his place. And on the resignation of Mr. Dawson in 1785, Mr. Tyfon was unanimously elected for the New Rooms, and Mr. King was also elected for the Lower Rooms without opposition.

Mr. Tyfon wears the medallion* that was presented to Mr. Dawson, and Mr. King wears the medallion† that was originally presented to Mr. Wade.

Since Mr. Nash's days, the office of Master of the Ceremonies has been an office of *profit* as well as honour. Each Master has a ball in the winter and spring seasons, and subscription-books are also laid down at the Rooms, that such of the company who

* Mr. Tyfon's medallion is made of fine gold, enamelled in the highest perfection, and enriched with brilliants. On one side is an elegant figure of Minerva, over which is the motto, *Decus et Tutamen*, and under, *Dulce est decipere in Loco*; round these, a rich border of enamel of the high Barré colour: on the reverse *Arbiter Elegantiarum* 30 Oct. 1777, decorated with wreaths of laurel and palm, beautifully enamelled on a blue ground in their proper colours.

† Mr. King's medallion is made of fine gold enamelled blue, and elegantly enriched with brilliants. On one side is a raised figure of Venus, with a golden apple in one hand and a rudder in the other: the motto, *Venus decens*. The reverse is a wreath of laurel; the motto, *Arbiter Elegantiæ Communis Consensu*.

are not present at the balls may have an opportunity of shewing those gentlemen marks of their respect.

Directions for TRAVELLERS, &c. when to pass over at AUST, and the NEW PASSAGES, between England and Wales.

The Passage over this great river (SEVERN) is of vast importance; and those who have occasion to cross over either of the Passages, are desired to observe that the time of high water at AUST PASSAGE is nearly the same as at Bristol Quay, and at the NEW PASSAGE near one hour sooner; and the hours of passage, at both places, are, if the wind is northerly, any time for five hours before, and if southerly or westerly, for seven hours after high water, at each place respectively. The time of high water at Bristol Quay, every morning and afternoon for the following week, may always be seen in the Bristol newspapers, published Monday, Thursday, and Saturday; and the variation from one day to another is about 50 minutes.

Prices of Goods, Cattle, and Passengers, at both Passages.

A Coach with six horses, 16s.—Ditto with four horses, 14s.—Ditto with two horses, 12s.—A Man, Woman, or Child, 4d. each.—A Man and Horse, 1s.—A single Horse, 8d.—Beasts, 4d. each.—Sheep, 2s. a score.—Hogs, 2s. 6d. a score

For the use and information of strangers resorting to Bath, lists are hereto subjoined of the Lodging and Boarding-Houses, and an alphabetical list of the Streets where they are situated;—Inns and Taverns, with the list of the Mail and other Coaches and Machines that set out from each;—Corporation of the City, Medical Faculty, Artists, and Attornies, with their places of residence;—Waggons, Carriers, and Barges to and from Bristol;—also an account of the Post to and from all parts of the kingdom, &c.

WAGGONS.

WALTER WILTSHIRE's Flying Waggon set out from Bath and London, every Sunday at six, and Wednesday evening at seven o'clock, and arrive in London and Bath Wednesday and Saturday mornings early.

The Slow Waggon set out from Bath every Monday, Wednesday, Thursday, and Saturday morning at 10 o'clock, and arrive in London, the Friday, Monday, Tuesday, and Thursday following at noon; set out from London, every Tuesday, Wednesday, and Saturday morning at five o'clock, and arrive in Bath Saturday, Monday, Thursday, and Friday, at two in the afternoon.

The Waggon set up at the White Swan, Holborn-bridge, London, and call at the White-Bear, and Old White-Horse Cellar, Piccadilly, to leave and take up goods and passengers.

The same Waggon go to and from Bristol every day.

Constant attendance is given at his house in Broad-street.

All goods intended for the Fly Waggon Sunday, must be brought in Saturday evening by seven o'clock. No charge taken of money, jewels, plate, glass, &c. unless notice given.

JOHN PARSONS's Flying Waggon (late J. Sartain James's) set out from his Warehouse, in Walcot-street, Bath, every Wednesday and Sunday nights; arrive at the New White-Horse-Cellar and Black-Bear, Piccadilly, and White-Bear, Basinghall-street, London, Saturday and Wednesday mornings; and return to Bath and Bristol in the same time.

These Waggon are very convenient for Passengers.

Also, his Waggon to Exeter and Plymouth, set out every Wednesday and Saturday after the London Fly arrives.

Call

Call at the Three-Crowns, Bridgwater, the George at Taunton, and return with goods and passengers every Saturday and Wednesday mornings, to be forwarded by the Flying Waggon to London.

Extra Waggon to any part of England.

Will not be accountable for Money, Plate, Jewels, &c. of more than 5l. value, unless entered as such.

Stage Waggon to Bristol every morning, (Sunday excepted) by John Parsons, in Corn-street; Anna Bascum, on the Quay; Ralph Davis, in Horse-street; and Cornelius Cutler, in Avon-street.

A Caravan sets out every Wednesday afternoon, from the New-Inn, in Kingsmead-square, to Cheltenham, Gloucester, Cirencester, and Tetbury; and returns every Tuesday.

Hunt's Caravan sets out every Saturday morning from the New-Inn, Horse-street, to Frome, Bruton, Redlinch, and Wincaunton; and goes every Monday to Sherborne, Dorchester, and Weymouth. Comes into Bath from Wincanton every Friday evening.

Persons who live in Bath may also send parcels every Wednesday afternoon into the country by the men who distribute THE BATH CHRONICLE; which is circulated in Amesbury, Atworth, Ashton, Aishcot, Avebury, Axbridge, BRISTOL, Bradford, Batheaston, Box, Bridgwater, Bruton, Berkeley, Bourton, Bathford, Backwell, Baltonsbury, Berrington, Blagdon, Blackford, Brent, Butley, Brinkworth, Brockley, Burnham, Chilcompton, Calne, Colerne, Corham, Castle-cary, Chippenham, Chew, Cirencester, Cheltenham, Chewton, Catcott, Chilton, Cossington, Cliefden, Compton-Martin, Crudwell, Castlecomb, Charlton, Christian-Malsford, Cricklade, Devizes, Dursley, Didmorton, Dunster, Edington, Everley, Frenchay, Frome, Frocester, Gloucester, Glastonbury, Harptree, Highbridge, Huntspill, Holt, Heytesbury, Hanham, Highworth, Hungerford, Ilchester, Kingsbury, Kingweston, Kingiton, Kington St. Michael, Langford, Lacock, Lavington, Lambourn, Long-Ashton, Langport, Longload, Melksham, Marshfield, Marlboro', Malmesbury, Minchinhampton, Minehead, Mark, Mere, Mells, Martock, Muchelney, Newport, Nunny, Pensford, North and South-Petherton, Pewsey, Petty-France, Puriton, Pawlet, Radstock, Ramsbury, Rodborough, Shepton-Mallet, Stroud, Seend, Sodbury, Swindon, SALISBURY, Sherborne, Street, Shapwick, Sutton, Somerton, Seagry, Trowbridge, Taunton, Tetbury, WELLS, Wincanton, Westbury, Wrington, Wantage, Whitechurch, Wootton-Basset, Wickwar, Wotton-Underedge, Wellington, Walton, Wick, Wollavington, Wrington, Woodchester, Yatton, &c. also in the intermediate villages, and to several Noblemen's and Gentlemen's seats, where no other conveyance reaches.

Likewise, to many of the above places every Sunday, by the men who carry HOOPER and KEENE's Bath Journal, and by the Carriers of the Bath Herald and Register every Saturday.

BARGES, for the conveyance of goods to and from Bristol, are kept by Mr. Ward in Bradley's-Buildings.
